ABSTRACT

Results of the 1983-1984 census of foreign students in the United States are presented. In addition to an overview of foreign study in the United States and other countries, data are provided on students' nationality, academic characteristics, personal characteristics, distribution by state, distribution in two- and four-year institutions, and in public and private institutions, institutions with the most foreign students, expenditures for living costs, intensive English language programs, and study abroad. Appendices provide information on: foreign student enrollments by institution and state for 1982-1983 and 1983-1984; foreign student detailed nationality data by region (i.e., extrapolated count, base numbers, percentage distribution, and percentage change); detailed field of study categories; codes for countries by continent and subregion; states within U.S. regions; foreign student enrollments in intensive English language programs by program and location; and the number of U.S. college-sponsored study abroad programs, 1982-1983, by region/country as well as by number of students by sex and field of study. Information on data collection procedures and sources of data is included, along with a questionnaire. (SW)

Guidelines for the Release of Census Data

Reports based on census data are available to individuals, agencies, or corporations for clearly identified purposes of scholarly research, public information, or recruitment.

Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a by-product of the census will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data be documented and to withhold data when the request is not deemed to be for appropriate scholarly, public information, or recruitment purposes.

The Institute of International Education (IIE) was founded over half a century ago to promote peace and understanding through educational and cultural exchanges. At present it is the largest not-for-profit organization in this field.

Among the services made possible through contributions are free information and counseling, student hospitality programs, a research and reference library, conferences/seminars, an overseas application information service, and publications relating to the field of international education. Contributions to the Institute are tax-deductible.

The Institute fulfills its mission through its services to sponsors—foundations, corporations, governmental agencies, and international organizations—and through its services to educational institutions and the general public. Services to its sponsors are self-supporting; services to educational institutions and the general public are made possible through contributions from individuals, foundations, and corporations.

Four IIE publications were used in the production of some sections of *Open Doors: 1983/84*. These publications can be purchased from the Communications Division, IIE. They are the following:

Costs at U.S. Educational Institutions: 1984/85, 192 pp., 1983, $22.95 (Annual).

English Language and Orientation Programs in the United States, 160 pp., 1984, $8.95.

Profiles: The Foreign Student in the United States, 188 pp., 1984, $22.95.

U.S. College-Sponsored Programs Abroad: Academic Year, 225 pp., 1984, $9.95 (Annual).

The Research Division (RD) of the Institute conducted the Annual Survey of Foreign Students with the guidance of the Interassociational Committee on Data Collection (ICDC). The RD can produce special reports from the data base for scholars and others interested in international educational exchange. For further information and charges contact the Research Division, IIE.

MAJOR TRENDS

Chapter 1: Overview. The rate of increase of the foreign-student population in the United States from academic year 1982/83 to 1983/84 was just 0.6%, the lowest growth rate since the early 1970s. The growth rate began to slow in the two previous years (3.3% and 4.6%, respectively) after several years of large increases—a growth rate that averaged 12.5% between 1975 and 1980.

The latest available data on international flows of students were extracted from Unesco's *Statistical Yearbook* 1982 to provide some perspective on the foreign-student population in the United States. The data reveal that in 1979, 31.3% of the 916,000 foreign students reported by Unesco were in the United States, more than twice the share in the next leading host country, France. Despite their large numbers, foreign students constituted only 2.4% of the U.S. student population in 1979, a much lower proportion than in France (10.6%), the United Kingdom (7.1%), and most other major countries.

Chapter 2: Nationality. For the first time in 10 years, Iran was not the leading country of origin of foreign students in the United States; it was surpassed by Taiwan after a fourth annual drop (of −23.9%) in its student numbers. All but three of the 15 leading countries of origin were OPEC and/or South and East Asian nations. The largest group of students came from South and East Asia (132,270 or 39.0%), with dramatic increases in students from China (30.7%), Malaysia (29.0%), Korea (22.0%), and Indonesia (21.5%). These increases were offset by decreasing enrollments from eight of OPEC's 13 countries, with Iran sending 6,400 fewer students, Venezuela 2,050 fewer, and Nigeria, 630 fewer. Overall, student numbers from OPEC nations dropped 10.0%.

Chapter 3: Academic Characteristics. Mathematics/computer sciences gained the most foreign students this year, increasing enrollments by 20.1%, mostly in the subfield of computer and information sciences. Engineering remained the leading field of study with 23.1% of all foreign students, a typical proportion over most years of the Census. Business and management and mathematics/computer sciences have steadily gained in both enrollment and share since the late 1960s, as more and more foreign students prepare for a world of international business and telecommunications.

The number of foreign students enrolled in U.S. associate-degree programs declined 12.5% from 1982/83 to 11.5%. This accompanied a decline in the number enrolled as freshmen or reported in "other" categories (practical training, nondegree, and intensive English language), resulting in fewer candidates for upper-level undergraduate programs. At the same time, the number of graduate students increased by 8,550 (7.8%), producing the first proportional increase in recent years. It is at the graduate level that the presence of foreign students has its largest impact on educational institutions—8.7% of all graduate students in U.S. institutions in 1983/84 were from other countries, compared with only 2.7% of the total U.S. student population—and in certain fields and institutions the proportion is much higher. The largest share (17.6%) of these students were studying for master's degrees, but the greatest proportional increase (49.8%) was in the relatively small numbers seeking professional training.

Chapter 4: Personal Characteristics. Once again, the data showed no significant change in the personal characteristics of foreign students. They were typically male (70.6%) and single (80.1%), primarily financed by personal and family funds (66.1%), and most often held F visas (83.2%).

Chapter 5: Distribution by State. Although California experienced the largest decline among states in foreign-student enrollment in 1983/84, it still led Senrollments with 47,246 foreign students, more than 17,000 ahead of the next leading state, New York.

For the first time, more foreign students were enrolled in institutions in the South than in other regions, followed closely by enrollments in the Midwest and the Northeast.

Chapter 6: Two- and Four-Year Institutions. As in the past, the proportion of foreign students enrolled in four-year institutions was larger (87.2%) than the proportion of all postsecondary students (60.7%). The number of foreign students enrolled in two-year institutions declined for the third year, by 4,575 students or 9.5%.

Chapter 7: Public and Private Institutions. The proportion of foreign students enrolled in public institutions remained at 65.0%, the same as in the last two years and almost unchanged since 1976/77. Similarly, public-school enrollments among the total U.S. student population rose only fractionally to 78.4%, also virtually unchanged since 1976/77.

Chapter 8: Institutions with the Most Foreign Students. There were 75 institutions with 1,000 or more foreign students in 1983/84, enrolling 38.5% of all foreign students. Largest foreign-student enrollments were at Miami-Dade Community College, the University of Southern California, and the University of Texas at Austin. Boston University reported enrolling the largest number of nationalities, 116.

Part II: Expenditures for Living Costs. Increases in both the cost per student and the number of foreign students resulted in estimated total expenditures for living costs of over $1.8 billion, a 5.0% increase over 1982/83 estimates.

Part III: Intensive English Language Programs. The number of students reported in this separate survey declined from 30,135 to 25,246, or by 16.2%. The leading countries or origin differed considerably from those reported in the Annual Census; such countries as Nigeria, Hong Kong, India, and Iran, prominent in the Annual Census, were not among the top 10.

Part IV: U.S. Study-Abroad Programs. Nearly 30,000 students were reported in IIE's survey of U.S. college-sponsored study-abroad programs in 1982/83. Data on these programs are accompanied by data from Unesco on U.S. citizens enrolled in overseas institutions in 1979. Both data bases show that the bulk of U.S. students abroad study in Europe.

ACKNOWLEDGEMENTS

To the thousands of men and women of the National Association for Foreign Student Affairs (NAFSA), and the American Association of Collegiate Registrars and Admission Officers (AACRAO), whose cooperation in the collection of these statistics is voluntarily given, whose professionalism and interest is always evident, and whose criticism has been constructive and, even more important, useful;

to the Bureau of Educational and Cultural Affairs of the United States Information Agency and, in particular, Joseph B. Bruns, Chief, Student Support Services, for support for the collection and analysis of the data;

to Leo Goldstone of the U.N. Statistical Office and former Chief of the Division of Statistics on Education, Office of Statistics, Unesco, who has served as a consultant to the Census;

to John F. Reichard, Executive Vice-President of NAFSA, and his staff at Washington, for tireless efforts on behalf of the ICDC;

to Kacey Chuilli for assistance in editing and proofreading tables and text for this book;

to our colleagues at IIE and in IIE's regional offices who have assisted both in the data collection effort and in the production of this book;

to Leo J. Sweeney and James Thomas, past and present presidents of AACRAO; Richard M. Krasno, president of IIE; and Robert B. Kaplan and Marvin Baron, past and present presidents of NAFSA, for their support and encouragement;

to these and the many other people who assisted in the preparation of this book we express our gratitude.

We dedicate this issue of *Open Doors: 1983/84* to the memory of Douglas R. Boyan, former manager of Statistical Research, IIE, in appreciation of his efforts to improve the quality and nature of the data collected on foreign students by promoting cooperation and understanding of the process by reporting officials.

DEFINITIONS

Foreign Student

A foreign student has been defined as anyone who is enrolled in courses in the United States who is not a citizen or an immigrant (permanent resident). Refugees are included.

F Visa

An F visa is a student visa which may be granted to bona fide students who satisfy requirements for pursuing a full program of study at a U.S. academic institution which admits foreign students, who enter the United States for a temporary stay and solely to study, and who have permanent residence in foreign countries which they have no intention of abandoning.

J Visa

A J visa is an exchange-visitor visa which is used to bring to the United States for a variety of educational purposes students, trainees, teachers, professors, research scholars, international visitors, or professional trainees who are sponsored by an agency or organization which has been approved for sponsorship by the Secretary of State for Exchange Visitors.

M Visa

An M Visa is the visa issued to students enrolling in a vocational training course (other than English language training).

Higher Education

In respect to the United States, "Higher Education" is used to describe the group of colleges and universities listed in the *Education Directory, Colleges and Universities—1981/82*. Printed by the U.S. Government Printing Office, it is National Center for Education Statistics document 82-306.

Fields of Study

The fields of study used in this document are those from *A Classification of Instructional Programs*, also published by the NCES. See Appendix 3 for the list of fields.

Regions

The countries and territories included under each major region are listed in Appendix 4.

INTRODUCTION

This edition of Open Doors contains the results of the 30th annual census of foreign students in the United States published in this series and conducted by the Institute of International Education (IIE). Since its founding in 1919, IIE has conducted numerous surveys describing international educational exchange. For 30 years, foreign student surveys were carried out in cooperation with the Committee on Friendly Relations Among Foreign Students.

In 1949, with the publication *Education For One World*, IIE began annual publication of statistics on foreign students in higher education. The series *Open Doors* was first published in 1955.

In 1974, concern over the data on foreign students in the United States led to discussions among representatives of IIE, the National Association for Foreign Student Affairs (NAFSA), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and the Bureau of Educational and Cultural Affairs of the U.S. State Department. These discussions resulted in the formation of the Joint Task Force on Data Collection with representatives from IIE, NAFSA, and AACRAO. The Task Force was renamed the Interassociational Committee on Data Collection (ICDC) in 1981.

As a result of deliberations of the Joint Task Force, a new reporting system was developed in which the institutional totals were requested instead of information on each individual student. This resulted in a substantial reduction in the amount of voluntary effort by reporting officials and a corresponding improvement in the response rate. While 61.8% of institutions polled in 1974/75 responded, 97.3% responded in 1983/84. Details of the response rate are provided in Appendix 6.

The new reporting methodology also produced a large enough aggregate base to permit extrapolations of data encompassing figures from institutions that provided partial reports. These calculations are detailed in Appendix 2.

One limitation of the new methodology was the loss of data on the individual student correlating his nationality, field of study, and other student characteristics. Based on the results of a survey conducted in the spring of 1979, it was concluded that the increased use of computers would make it possible for a sufficiently large sample of institutions to provide selected individual data on their foreign student population. IIE initiated a biennial survey in the academic year 1979/80 to request individual data on foreign students. These data, which allow the correlation of country, field of study, academic level, and sex for foreign students, are published in the companion publication *Profiles: The Foreign Student in the United States*. The third edition of *Profiles*, based on the 1983/84 academic year, will be published next spring.

In conducting these surveys, the voluntary cooperation of college registrars, admissions officers, and foreign student advisers has been a major component in successful implementation.

Part I: THE ANNUAL CENSUS OF FOREIGN STUDENTS IN THE UNITED STATES

1. OVERVIEW OF FOREIGN STUDY

This chapter provides an overview of foreign study both in the United States and throughout the world. The first section provides a summary of data from the Annual Census of Foreign Students in the United States, conducted by IIE since the academic year 1954/55. The second section summarizes data collected by Unesco and published in Unesco's *Statistical Yearbook, 1982*.

The Annual Census of Foreign Students in the United States

There were 338,894 foreign students reported in the United States in 1938/84, an increase of only 1,909 students (0.6%) over the number reported in 1982/83, indicating a plateau in the pattern of growth. This was the lowest rate of increase since the Census recorded its only actual drop in enrollment (-3.2%) in 1971/72, and continues a decline in the growth rate that began in the late 1970s (**Table 1.0** and **Figure 1A**).

The data presented in *Open Doors* were collected in a survey of 2,844 institutions; 2,766 (97.3%) responded, 268 of which reported enrolling no foreign students. The 2,498 institutions reporting a foreign-student enrollment represented a decrease of 1.2% from 1982/83 (**Table 1.1**). A summary of the survey response data appears in **Appendix 6**.

It should be noted here that variations will appear in student totals in various tables in this book. For instance, **Table 1.0** lists the total number of foreign students reported as 338,894, the actual number; in **Table 1.2** and in other tables throughout this book, that figure has been rounded off to 338,890. Additionally, Unesco data presented in this edition of **Open Doors** which differ from corresponding data given in earlier

editions reflect revisions resulting from the receipt of further information from member countries.

Highlighted in **Table 1.1** are the large increases in the number of foreign students reported in the late 1970s, as well as fluctuations in the number of institutions reporting foreign students. In 1981/82, elimination of a number of institutions surveyed resulted in a 10.2% decrease in the number of institutions reporting foreign students, although the number of foreign students reported by accredited institutions increased 6.0%. In 1983/84, foreign-student enrollment remained stable despite the small decrease (1.2%) in the number of institutions reporting foreign students.

The slowdown in the growth rate in recent years can be attributed in part to dramatic decreases since 1980 in the number of students from Iran. As seen in **Table 1.2**, while there was a fairly constant rate of increase in the number of foreign students in general from 1975 to 1980, during these years Iranian enrollment nearly tripled. After 1980, Iranian numbers fell sharply, though other student numbers continued to grow.

Although the rate of increase has steadily slowed since 1980, if the substantial Iranian decrease of 23.9% in 1983/84 is taken out, all other enrollments represented a 2.7% increase in foreign students.

Foreign students represent only a small fraction of all students in higher education in the United States. As **Table 1.3** shows, for over 20 years foreign students accounted for an average of 1.5% of all such students, as reported by the National Center for Education Statistics. However, since 1976/77, this figure increased from 1.8% to 2.7% in 1982/83, a result of relatively stable U.S. enrollments at a time when foreign-student enrollment continued to grow. The proportion remained at 2.7% in 1983/84, despite the stabilized foreign-student enrollment, because total U.S. enrollment dropped slightly.

Unesco Data on Foreign Study*

The latest available data on the international exchange of students in higher education are from 1979.

* *Source: Unesco: Statistical Yearbook, 1982.*

[1] *Source: National Center for Education Statistics.*

[2] *Figures are for 1978.*

[3] *Figures are for 1977.*

In that year, 916,000 foreign students were reported by 106 responding countries (**Table 1.4**), according to Unesco's *Statistical Yearbook*, 1982. **Figure 1B** illustrates this distribution in leading host countries. European countries were host to the most foreign students, 376,783. North America followed, reporting a total of 323,843 students, 286,340 of whom were studying in the United States.

Foreign enrollments increased dramatically between 1970 and 1979 in many of the leading host countries (**Table 1.5**). The United States reported increases totaling 97.9% from 1970 to 1979. Enrollments in France increased 224.8% over the same period, while in the Federal Republic of Germany and the United Kingdom enrollments increased by 106.8% and 130.7%, respectively.

The impact of foreign students on the educational institutions of a host country is related in part to the proportion they form of the total student body. As shown in **Table 1.6** and **Figure 1C**, these proportions vary significantly among leading host countries. Four countries reported foreign-student enrollments of more than 10% in their colleges and universities: France (10.6%), Switzerland (16.7%), Saudi Arabia (21.3%), and Lebanon (35.1%). Four countries reported foreign enrollments of less than one percent: Japan (0.2%), India (0.2%), the Philippines (0.5%), and Brazil (0.9%). Of the host countries with the largest foreign enrollments, the United States (2.4%) and the Soviet Union (1.0%) reported small proportions of foreign students, while, in addition to France, the Federal Republic of Germany (5.0%) and the United Kingdom (7.1%) reported relatively larger ratios.

In actual numbers, however, in 1979 the United States led in enrollments, reporting more than twice the number of foreign students reported by the second-largest host country, France (286,340 and 112,042, respectively). The U.S.S.R., the Federal Republic of Germany, and the United Kingdom each reported approximately 60,000 students. These five countries enrolled more than two-thirds of the foreign students reported in a Unesco subsample of 45 host countries with the largest foreign-student bodies (**Table 1.7**), the United States accounting for a healthy 34.2%. Approximately 25% of all foreign students attended institutions in the next 20 leading countries, while less than 5% were enrolled in the following 20 countries.

Unesco states that this subsample reflects "approximately 90% of the known total." These data likely understate worldwide flows of students. Several countries reporting large numbers of foreign students are not listed among the 45 selected countries because they did not provide data on the country of origin of their foreign students: Brazil, which reported 11,730 students (last reporting in 1978); Romania, with 14,438 students; Lebanon, with 29,869; and Syria, Bulgaria, and Norway (4,608, 3,597, and 1,181, respectively). Also countries are excluded that have not provided data in a number of years. Only five South American countries provided data on foreign students in 1979; Argentina, which last reported in 1975 (16,615 students), is not included, nor are Colombia, Ecuador, and Uruguay (1,195, 671, and 1,443, respectively, in 1970).

As illustrated in **Figure 1D,** the United States was host to a large proportion of students from the Middle East (44.7% of those represented in the subsample), North America (47.3%), Oceania (52.3%), South America (51.0%), and South and East Asia (46.5%). European students were distributed more evenly in the four leading host countries, and a large proportion (39.7%) studied in the next 20 countries. These countries, which include many in Europe and the Middle East, also attracted large proportions of students from the Middle East (31.5%) and the U.S.S.R. (36.4%).

Differences in the regional composition of foreign-student populations in individual host countries can be seen in **Table 1.8** and **Figure 1E**. For example, Africans comprised 52.8% of all foreign students in France and 19.8% of all foreign students in the subsample, but only 7.1% in the Federal Republic of Germany. Europeans, comprising 62.7% of foreign students in Italy and 67.5% of those in Austria, accounted for only 7.7% of foreign students in the United States. More than 60% of the foreign students in Egypt were from its region, the Middle East. This region accounted for the largest share (22.3%) of all foreign students in the 45 leading host countries.

A number of other host countries reported more than 50% of their foreign students as coming from their own world region. Among these were Italy, Switzerland, Sweden, and Austria in Europe; Saudi Arabia and Turkey in the Middle East; and Japan in South and East Asia. By contrast, the six leading host countries reported a more diverse foreign-student population.

Some insight into these patterns is provided by the country-of-origin data in **Table 1.9**. Ten of the leading countries of origin sent more than 80% of their students to the four leading host countries in 1979; several countries sent more than two-thirds to a single host country, in most cases, one of the leading five. Iran, China (both Taiwan and the People's Republic of China), Nigeria, Canada, Japan, Venezuela, India, and Saudi Arabia sent the bulk of their students to the United States. Half of Malaysian students studied in the United Kingdom, while nearly half of Turkish students studied in the Federal Republic of Germany. The bulk of Algerian students (71.7%) studied in France, while the majority of Palestine refugees (60.1%) studied in Egypt. The five leading host countries attracted large numbers of students from countries representing all world regions.

[1] *Percentages are based on the student total for each country of origin. Blanks indicate less than 0.1%.*

[2] *Student total are for the 45 leading host countries that provided data on country of origin. The U.S.S.R., the third largest host country (62,942 foreign students in 1978) and the German Democratic Republic (6,607 in 1979) are omitted from this table because they reported country-of-origin data for only a limited number of countries, none of which are among the leading countries of origin. Countries that reported large numbers of foreign students but did not report country of origin include: Lebanon (29,869 foreign students in 1979), Romania (14,438 in 1979), and Brazil (11,730 in 1978).*

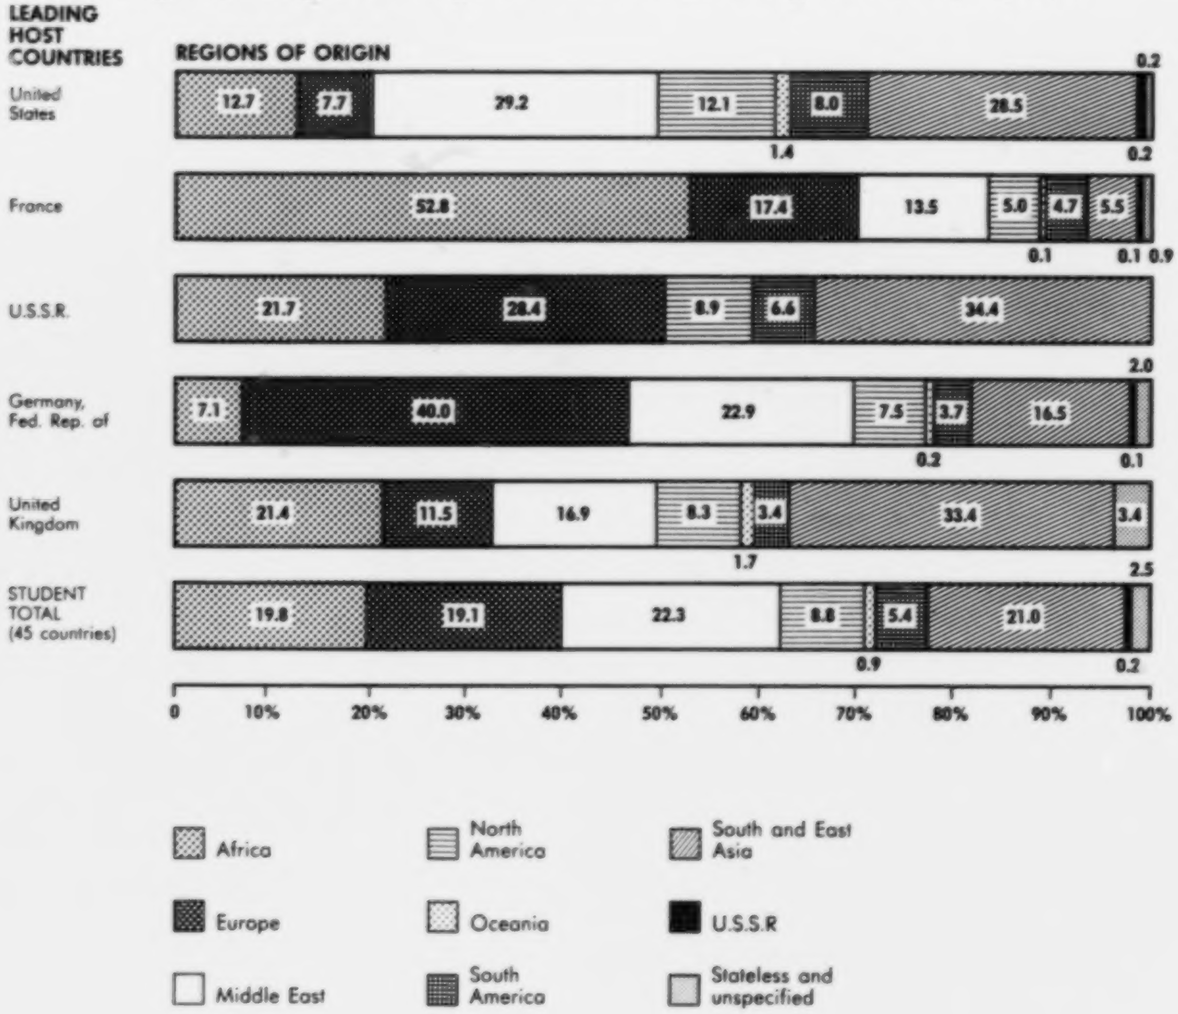
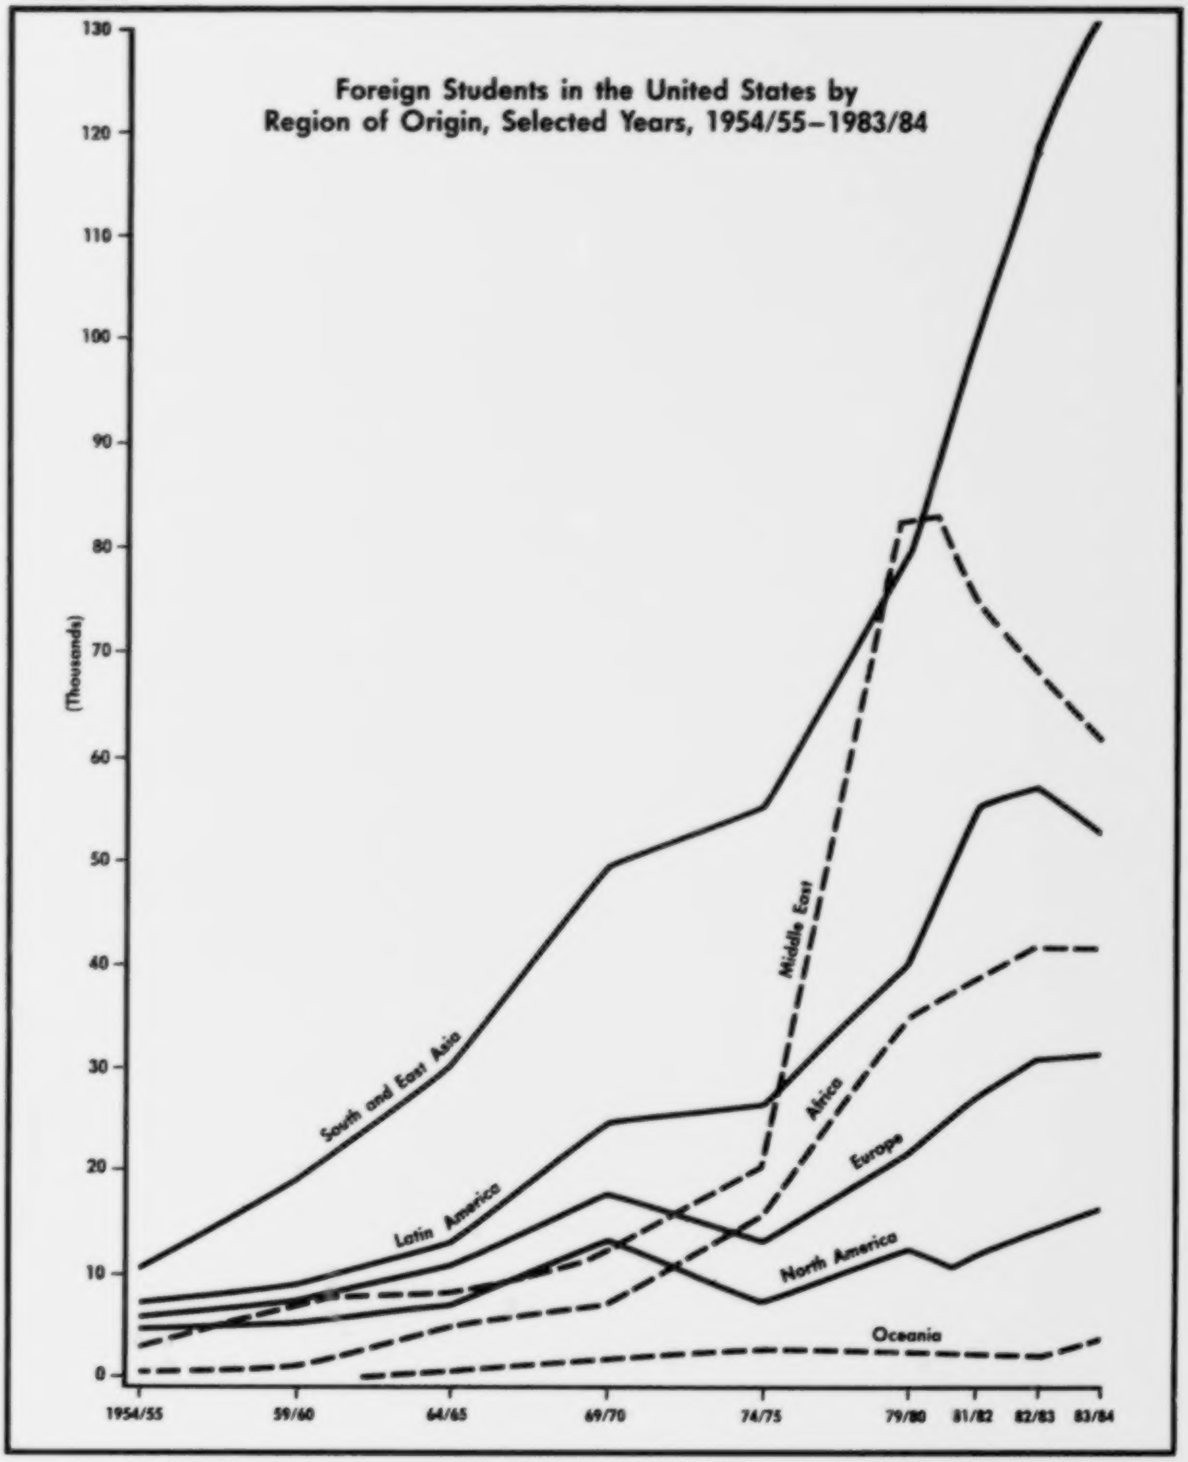
FIGURE 1E

Region of Origin of Foreign Students in Five Leading Host Countries, 1979



2. NATIONALITY

FIGURE 2A



Over the years, the international flow of students to the United States from different world regions, subregions, and countries has often fluctuated. The 338,894 foreign students reported in 1983/84 came from 191 countries and territories. This chapter examines the major trends and relationships in the flow of nationalities last year and over the Census' 30 years. **Appendix 2** compares 1982/83 and 1983/84 figures on country of citizenship.

Distribution by Region of Origin

Although foreign-student numbers in general have increased steadily for 30 years, increases have varied from region to region, as illustrated in **Table 2.0** and **Figures 2A** and **2B**.

The majority of foreign students in 1983/84 came from South and East Asia, continuing a pattern broken only once (by the Middle East in 1979/80) since the Census began. This region sent 132,270 students to the United States, or 39.0% of all foreign students reported in the Annual Census. This increase of 12,620 or 10.5% over 1982/83 is more than 17 times the 0.6% increase in all foreign students. As shown in **Table 2.1**, half (50.3%) of the students came from the subregion of East Asia, which contributed a 9.6% rise in enrollments. The largest proportional increase (14.6%) of Asian students came from the subregion of Southeast Asia.

Since 1975/76 Middle Easterners have comprised the second-largest group of foreign students, although their ranks have declined in recent years. The flow of students from this region has fluctuated more than from other regions. In 1974/75 their numbers began to increase rapidly, led by Iranian enrollments; the annual increase averaged 29% from 1974/75 to 1979/80. In 1979/80 this surge surmounted South and East Asian enrollments, becoming the largest source (29.2%) of foreign students. In 1981/82 enrollments from the Middle East declined by 12.2% to 74,390, the first decrease since 1971/72. In 1983/84 the region sent 6,620 fewer students (−9.8%) than in 1982/83. Both the surge and decline were led by Iran, the region's largest source of foreign students in the United States. Excluding Iranian numbers (which declined by 23.9% in 1983/84), the region still showed a small decline (−0.5%) in 1983/84.

The third-largest group of foreign students, those from Latin America, made up 15.5% of the U.S. foreign-student population. More than half (55.0%) of these students came from South America (**Table 2.1**). The number of Latin Americans decreased 7.9% (4,460 students) in 1983/84, after increases in the three previous years.

1973/74	12,937	8.6	15,539	10.3	30,276	20.0	18,381
1974/75	18,400	11.9	13,740	8.9	26,270	17.0	23,910
1975/76	25,290	14.1	14,400	8.1	29,820	16.6	32,590
1976/77	25,860	12.7	16,700	8.2	37,240	18.4	38,490
1977/78	29,560	12.6	19,310	8.2	38,840	16.5	57,210
1978/79	33,990	12.9	21,690	8.2	41,120	15.6	70,430
1979/80	36,180	12.6	22,570	7.9	42,280	14.8	83,700
1980/81	38,180	12.2	25,330	8.1	49,810	16.0	84,710
1981/82	41,660	12.8	28,990	8.9	55,360	17.0	74,390
1982/83	42,690	12.7	31,570	9.4	56,810	16.9	67,280
1983/84	41,690	12.3	31,860	9.4	52,350	15.5	60,660

The 41,690 African students represented 12.3% of all foreign students in the United States in 1983/84, approximately the same share as in 1982/83 (12.7%). Comprising only 3.6% of foreign students in the United States in 1954/55, their proportion grew steadily throughout the 1950s and early 1960s, jumped in the 1970s, and has remained fairly stable since the mid-1970s. The majority of Africans (58.4%) came from West Africa in 1983/84 (**Table 2.1**).

In 1983/84, the number of foreign students from Europe rose slightly to 31,860 from 31,570 in 1982/83. These students came principally from countries in Western Europe (94.3%). Though actual numbers increased, the proportion of students coming from Europe gradually declined during the first years of the Census, remained fairly constant at about 8% from 1975/76 to 1980/81, then grew slightly in the last three years to 9.4% of all foreign students.

There were 15,670 students from North America (96.7% from Canada) reported in 1983/84, 4.6% of foreign-student enrollments and an increase of 7.5% from the 14,570 in 1982/83. The proportion of students from Oceania remained at 1.2%, a total of 4,090 students. The majority of these students came from the Pacific Islands Trust Territory (1,580) and Australia (1,530).

Distribution Within World Regions

The overall pattern of origin of foreign students from world regions masks shifts within each region. This section highlights changes in student representation from the five leading countries of origin within five of the seven world regions.

The five countries in each world region that sent the most foreign students to the United States in 1982/83 continued to lead in 1983/84, although some rankings changed (**Table 2.2**). (Student totals for all countries reported and percentage changes from 1982/83 to 1983/84 can be found in **Appendix 2**.) There were no shifts in ranking in Europe and Latin America, although Venezuela and Mexico (the two leading countries in Latin America) experienced sharp declines in enrollment, 13.2% and 22.9%, respectively. Ethiopia moved from fifth to third place among African countries because of a 13.0% increase in student numbers. Iran and Saudi Arabia ranked first and second in the Middle East again this year despite decreases of 23.9% and 6.7%, respectively. Jordan took third place from Lebanon due to a 6.0% decline in Lebanese enrollment. Korea moved from fifth to third place in South and East Asia with a 22.0% increase in student numbers, while Japan dropped to fifth place from third because of a 4.4% decrease.

During the early years of the Census, Egypt led African countries in the number of students studying in the United States, but 20 years ago Nigeria took over as the leading African nation of origin, in recent years representing nearly half of all African students. In contrast, leading European countries have remained more evenly represented; their distributional pattern has not changed significantly in 20 years. In 1983/84, the United Kingdom sent 18.4% of the European students enrolled in U.S. institutions, followed closely by Greece (15.8%); Germany sent 11.9%, and France, 10.0%.

The five leading countries in Latin America sent 55.1% of the region's students. Among Latin American countries with more than 1,000 students, several Caribbean countries had increases in enrollment: Trinidad and Tobago (9.3%), Cuba (11.9%), and Haiti (14.0%). In contrast, foreign-student enrollment from most countries in Central and South America declined. The largest declines were from Mexico (down 22.9% to 5,600), El Salvador (down 16.3% to 1,390), Venezuela (down 13.2% to 13,440), and Ecuador (down 12.4% to 1,130 students).

One-third of all Middle Eastern students in 1983/84 were Iranian, despite a continuing downward trend. Iran has been the leading country in the Middle East since the Census began, at one point (1979/80) sending more than 60% of the students from this region. The Middle East's five leading countries represented more than three-quarters of the regional total.

The pattern of representation has been shifting in South and East Asia in recent years. Although Taiwan remained the leading country of origin, its share continued to drop as student numbers from other countries in the region increased rapidly. These countries included: China (with an increase of 30.7%), Malaysia (an increase of 29.0%), Korea (22.0%), Indonesia (21.5%), Sri Lanka (18.1%), and Singapore (31.3%).

Leading Countries of Origin

Seven of the 15 leading countries of origin in 1954/55 reappeared in 1983/84, although their relative positions shifted considerably over the years (**Table 2.3**). Many of the changes are attributable to the rise in student numbers from OPEC countries and countries in South and East Asia. Many of these countries have moved up in rank, in some instances replacing European and Latin American countries that once predominated. In 1983/84 all but three of the 15 leading countries (Canada, Jordan, and Lebanon) were OPEC or South and East Asian nations.

Taiwan edged out Iran in 1983/84 to become the leading country of origin, sending 21,960 students. Both Iran and Nigeria sent more than 20,000 students, followed by Malaysia (18,150 students). Venezuela dropped from fourth place to eighth with a loss of 2,050 students. Mexico, whose student numbers declined to 5,600 from 7,260, dropped from the top 15 countries and was replaced in 12th place by China (up from 16th place).

Saudi Arabia	9,250	8,630	(620)	(6.7)
Vietnam	4,920	4,360	(560)	(11.4)
Venezuela	15,490	13,440	(2,050)	(13.2)
Mexico	7,260	5,600	(1,660)	(22.9)
Iran	26,760	20,360	(6,400)	(23.9)
TOTAL	**241,910**	**243,380**	**1,470**	**0.6**
All Foreign Students	**336,990**	**338,890**	**1,900**	**0.6**
Percentage of All Foreign Students	**71.8**	**71.8**		

Although the same countries reappear in the 1983/84 list of the 25 nations sending the most foreign students to the United States, there were changes in rankings in addition to those mentioned above (**Table 2.4**). Among these, Indonesia, whose student numbers increased 1,080 over 1982/83, moved from 18th place to 16th, while Vietnam dropped to 21st place from 19th with an 11.4% decrease in students.

Table 2.5 lists the 25 leading countries of origin in order of percentage change in student numbers from 1982/83 to 1983/84. China, Malaysia, Korea, and Indonesia top the list with dramatic increases of 30.7%, 29.0%, 22.0%, and 21.5%, respectively. Mexico and Iran end the list with large reductions in student numbers, 22.9% and 23.9%, respectively. The 25 leading countries of origin accounted for 71.8% of the foreign-student total in 1983/84 and 77.4% of the net increase in numbers.

Countries and territories with more than 1,000 students reported in 1983/84 are listed in **Table 2.6** and illustrated in **Figure 2C**. In 1954/55 only eight countries sent more than 1,000 students; in 1983/84 there were 64, more than one-third of all countries and territories of origin. These countries accounted for 92.0% of all foreign students reported.

OPEC Nations

The doubling of foreign-student numbers from 1969/70 to 1979/80 was due in large part to the sevenfold increase in students from the 13 member nations of the Organization of Petroleum Exporting Countries (OPEC). During the last half of the 1970s, the proportion of students coming from OPEC nations rose from 19.2% to 35.0%. By 1983/84, however, OPEC's share dropped to 23.6%, the third decline from OPEC countries in as many years (**Table 2.7**).

OPEC enrollment decreased by 8,853 students from 1982/83; eight of the 13 OPEC nations experiencing losses (**Table 2.8**). Iran's enrollments dropped by 6,400 students (−23.9%), Venezuela's by 2,050 (−13.2%), Nigeria's by 630 (−3.0%), and Libya's by 410 (−19.3%). Only Indonesia's enrollments increased significantly (by 1,080 or 21.5%).

As **Table 2.9** shows, OPEC enrollments decreased by 10.0% in 1983/84, while enrollments from all other countries increased by 4.3%. Even excluding the large Iranian decline, the 12 remaining OPEC countries showed an average decrease of 4.0%.

TABLE 2.6

Countries and Territories with More Than 1,000 Students in the United States, 1983/84

Country/Territory	Foreign Students	Country/Territory	Foreign Students

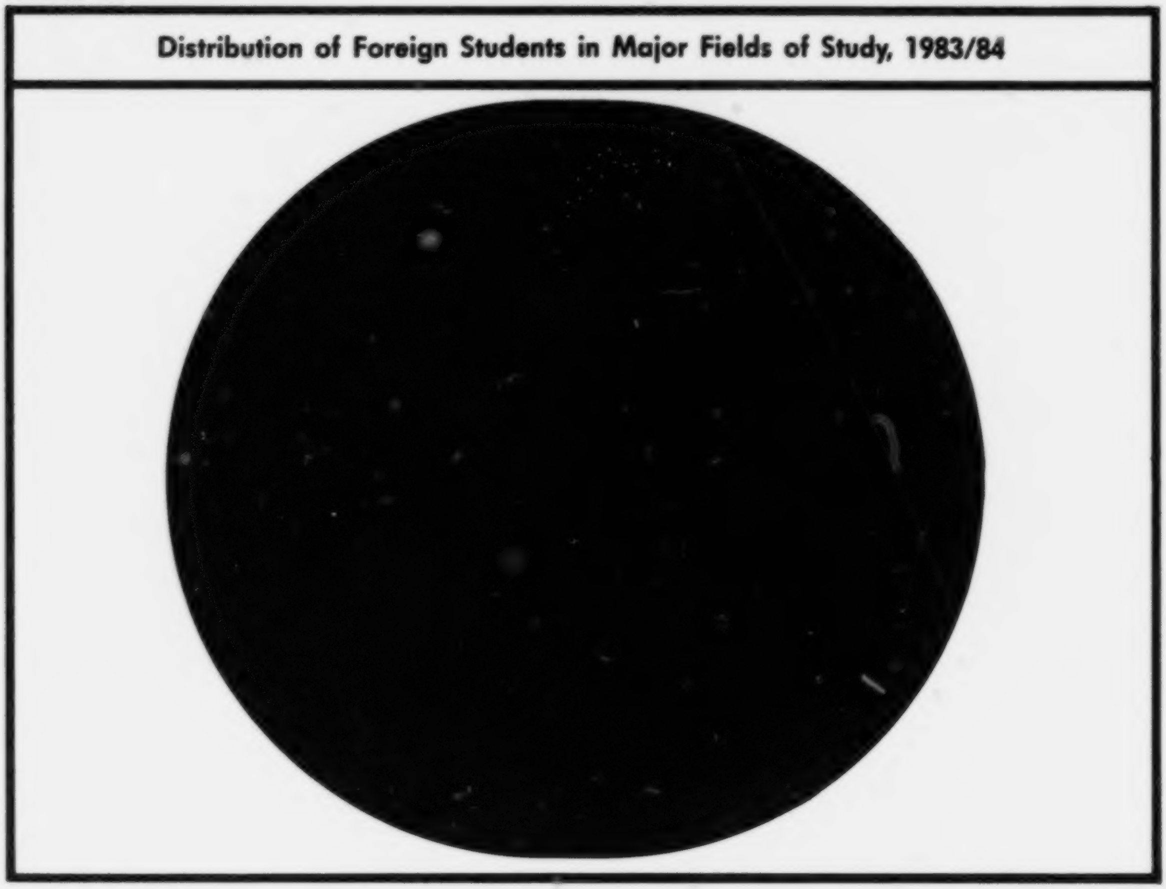
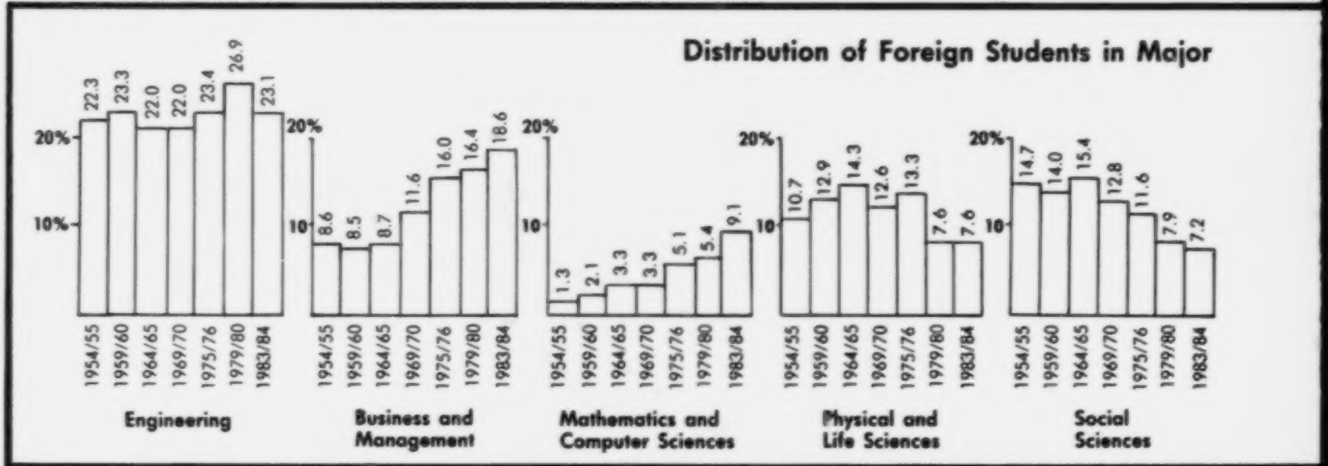
3. ACADEMIC CHARACTERISTICS

FIGURE 3A



Distribution of Foreign Students in Major Fields of Study, 1983/84

FIGURE 3B



Distribution of Foreign Students in Major

Field of Study

The most popular field of study among foreign students in 1983/84 (and throughout the Census' 30 years) was engineering, the choice of 23.1% of all students reported (**Figure 3A**). Next was business and management, chosen by 18.6% of foreign students. Following but grouped far behind the leading fields were mathematics/computer sciences (9.1%), physical and life sciences (7.6%), and social sciences (7.2%).

Table 3.0 lists data for the last three years in 46 field-of-study subcategories outlined in *A Classification of Instructional Programs**, published by the National Center for Educational Statistics (NCES). (**Appendix 3** contains a summary of field-of-study categories, as well as the NCES detailed classification of programs.) The choice of major field of study changed only slightly over the last three years. Most significant in 1983/84 was a 20.1% increase in the number of foreign students majoring in mathematics/computer sciences. This major category increased by 5,170 students, most of them in the subfield of computer and information sciences. Another large increase occurred in health sciences (10.4%), where a gain of 1,540 students (17.4%) in the health science subfield offset a loss of 290 or 9.3% in the allied health subfield.

The major fields of engineering, business and management, social sciences, education, and humanities showed numerical increases. Three major fields registered declines: physical and life sciences (a loss of 1,030 students), fine and applied arts (340 fewer students), and agriculture (280 fewer).

Although short-term changes were relatively slight, there have been substantial long-term shifts in the choice of majors among foreign students (**Table 3.1** and **Figure 3B**). Business and management and mathematics/computer sciences have showed consistent gains in enrollment numbers and percentages, while the proportions of foreign students studying humanities, social sciences, physical and life sciences, and health sciences have dropped considerably since the late 1960s. Engineering, education, fine and applied arts, and agriculture have attracted a fairly consistent proportion of foreign students over the 30-year history of the Census.

Distribution by Institutional Type and Institutional Control

In 1983/84, 87.2% of all foreign students reported were enrolled in four-year institutions; in five fields of study the total was more than 95%: 95.1% of foreign students in agriculture attended four-year schools, as did 95.6% of education majors, 97.4% of humanities students, 95.9% of physical and life science students, and 96.8% of social science students (**Table 3.2**). A relatively smaller percentage (77.8%) of students in the "other" category attended four-year institutions.

The distribution of foreign students among public and private institutions differed substantially. While 65.0% of all foreign students were enrolled in public institutions in 1983/84, public schools claimed 96.9% of foreign students majoring in agriculture and 76.8% of those in mathematics/computer sciences. Private institutions, with 35.0% of the total foreign-student body, reported enrolling approximately half (53.0%) of all

students studying humanities and nearly half (46.3%) of those in fine and applied arts.

Field-of-Study Choices in Two- and Four-Year Institutions

Because the vast majority of foreign students in the United States were enrolled in four-year institutions, field-of-study choices by these students were similar to those of the foreign-student body as a whole. Choices by students in two-year institutions, however, differed considerably, as **Table 3.3** and **Figure 3C** show. A greater percentage of foreign students in two-year colleges chose business and management (23.0%) than did those in four-year schools (18.0%) and in the "other" category the proportion was doubled (13.1% versus 6.0%). In contrast, only 2.0% of two-year students studied social sciences compared to 7.9% of four-year students, while physical and life sciences was chosen by only 2.7% of foreign students in two-year institutions, compared with 8.3% in four-year schools. The proportions of two-year students majoring in agriculture, education, fine and applied arts, and humanities were also smaller than in four-year institutions.

Field-of-Study Choices in Public and Private Institutions

More than one-fifth (21.9%) of foreign students in U.S. private institutions in 1983/84 studied business and

management, compared to 16.9% in public institutions (**Table 3.4**). Private institutions also reported larger percentages of students in humanities, social sciences, and fine and applied arts. Public institutions reported larger proportions of foreign students in engineering, agriculture, mathematics/computer sciences, physical and life sciences, and education.

Academic Level

As illustrated in **Figure 3E**, the largest proportion of foreign students (46.7%) were enrolled in bachelor's-degree programs, with an additional 11.5% enrolled in associate-degree programs. Of the 35.1% enrolled in graduate programs, the largest proportion (17.6%) were studying for master's degrees.

The academic levels of foreign students for the last three academic years are shown in **Table 3.5**. Enrollments in associate-degree programs dropped by 5,600 students in 1983/84, a decline of 12.5% from the previous year. The number of foreign students in bachelor's-degree programs increased only slightly (by 0.2% or 320 students). This slight increase was almost entirely in enrollments at the senior level. Freshman and sophomore enrollments declined, freshmen for the second year in a row. Coupled with the decline in associate-level students and in students reported in "other" categories (practical training, nondegree, and intensive English), this suggests a trend toward declining foreign-student enrollments at the bachelor level.

Conversely, there were 8,550 more foreign students reported in graduate-degree programs in 1983/84, an increase of 7.8%. The largest proportional increase (49.8%) occurred in the number of students seeking professional training.

The significance of this increase in graduate students is revealed in **Table 3.6**, which shows an increase in the overall proportion of graduate to undergraduate students for the first time in recent years.

Enrollment Status

The vast majority of foreign students (91.6%) were enrolled as full-time students (**Figure 3F**); this percentage has remained fairly constant in recent years (**Table 3.7**).

As shown in **Table 3.8**, more foreign students in two-year institutions (15.9%) were enrolled part-time than in four-year schools (7.3%), and a larger proportion of foreign students in public institutions (9.9%) studied part-time than in private schools (5.6%).

FIGURE 4A

Foreign Students by Sex, 1983/84

FIGURE 4B

Foreign Students by Marital Status, 1983/84

Distribution of Foreign Students by Sex

In 1983/84, there were 239,410 male (70.6%) and 99,480 female (29.4%) foreign students reported in the Census (**Figure 4A**). Gender ratios, summarized in **Table 4.0** for selected years since 1954/55, show a gradual increase in the proportion of women students since 1959/60.

Though proportional gains by women were small, they were persistent in both two-year and four-year institutions and in public schools. In private institutions the percentage of women dropped slightly from 30.7% in 1981/82 to 30.3% in 1983/84, as shown in **Table 4.1**.

Marital Status of Foreign Students

Approximately 80% of all foreign students reported in 1983/84 were single (**Figure 4B**); this percentage has remained basically unchanged for the last three survey years (**Table 4.2**).

As seen in **Table 4.3**, a higher proportion of foreign students enrolled in two-year institutions were single (88.5%), compared to those in four-year institutions (79.0%). In private schools, single foreign students comprised 83.4%, and in public, 78.2%.

Primary Sources of Funds of Foreign Students

Personal and family funds were the primary source of income for approximately two-thirds of all foreign students reported in the United States (**Figure 4C**). Home governments were the primary source of income for 12.4% of these foreign students, while another 10.0% were supported primarily by their U.S. college or university. These three sources of income provided primary funds of 88.5% of all foreign students in 1983/84.

Figure 4C separates sources of funds originating in the United States from foreign sources, including personal and family funds. A small proportion of students received primary support from U.S. sources (16.9%), while the majority (81.3%) were supported by funds originating outside the United States.

A breakdown of the primary sources of funds for foreign students for the last three Census years is provided in **Table 4.4** and **Figure 4D**. As already noted, the majority of students relied on personal and family funds for their education; although this majority grew in 1982/83, in 1983/84 it decreased by 2.0%. The largest growth in funding in the last year (omitting the "other" category) came from U.S. private sponsors (up 25.6%), followed by an increase in students funded by colleges and universities (up 13.9%). Students funded by home governments declined in both absolute and relative value again this year, down from 13.4% in 1981/82 to 12.4% in 1983/84.

Two- and Four-Year Institutions

The most significant difference in funding between two- and four-year institutions in 1983/84 was in the proportion provided by the institution; less than 1% of two-year schools provided primary funding compared to 11.8% of four-year institutions (**Table 4.5**). Many

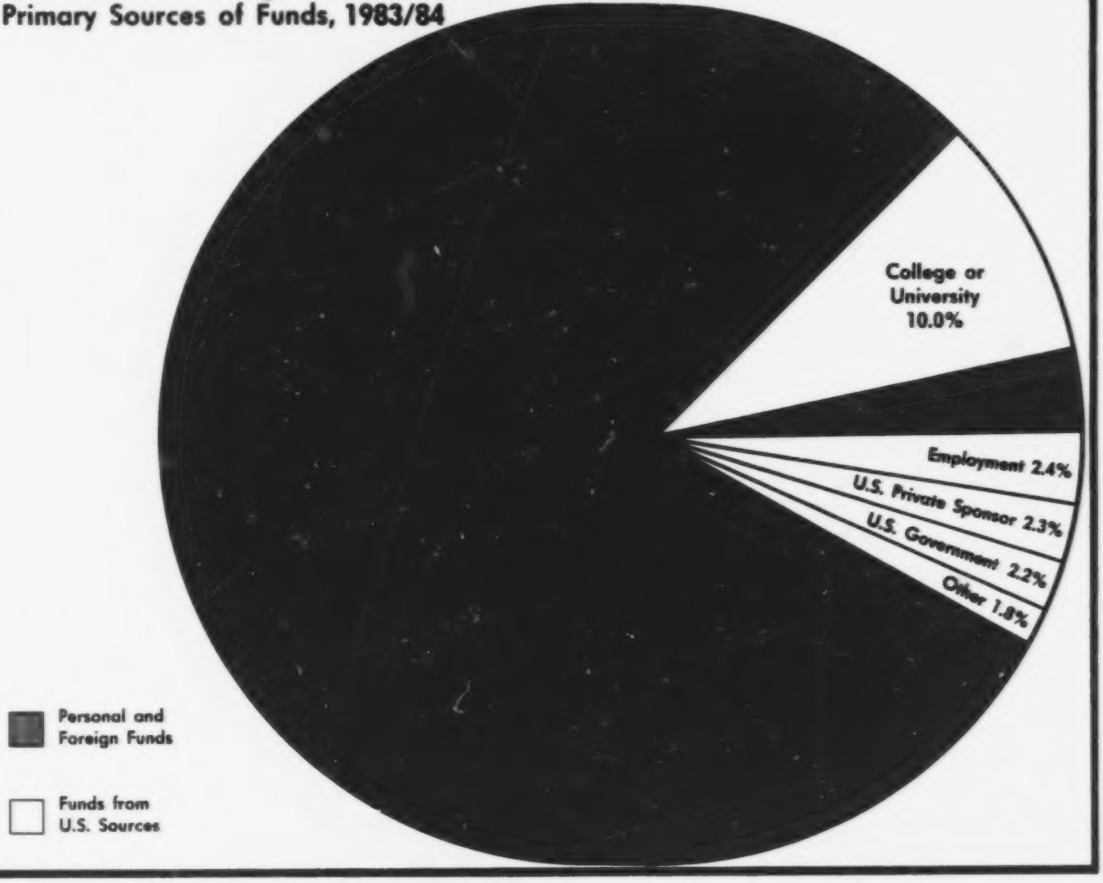
FIGURE 4C

Distribution of Foreign Students by Primary Sources of Funds, 1983/84



more students in two-year institutions (82.2%) relied on personal and family funds than did their counterparts in four-year institutions (63.1%). The proportion of two-year students reporting the U.S. government as their primary source of funds (3.4%) was slightly higher than the percentage for all foreign students (2.2%), while the proportion of two-year students relying on funding from their home government was lower (7.3% compared to 12.4%).

Public and Private Institutions

The primary funding pattern was similar for both public and private institutions in the last academic year (**Table 4.5**). Slightly larger proportions of students in public schools relied on personal and family sources (67.3%) or on home governments (12.6%) for support than their counterparts in private schools (64.0% and 12.0%, respectively). In private schools, however, larger percentages of foreign students obtained support from colleges and universities (11.9%) or from U.S. and foreign private sponsors (3.1% and 3.5%) than did their public-school counterparts (8.9%, 1.8%, and 2.4%, respectively).

Visa Types

The vast majority of nonimmigrant foreign students in the United States in 1983/84 held F visas (83.2%), the visa for students pursuing a full program of study (**Table 4.6** and **Figure 4E**). An additional 8.2% held J visas, the exchange-visitor visa for students or trainees in sponsored programs. Refugees accounted for 3.4% of foreign students in 1983/84, while a slight 0.2% held M visas, the visa for students enrolled in vocational training courses.

The proportion of refugees was much higher among students in two-year institutions (15.3%) than in four-year institutions (1.6%). The percentages of students on F and J visas were somewhat lower (75.9% versus 84.3% and 0.6% versus 9.4%, respectively). These differences are illustrated in **Figure 4F** and **Table 4.7**.

Table 4.7 shows also the visa status of students in public and private institutions, illustrated in **Figure 4G**. Differences were slight; the most notable was the lower proportion of refugees in private institutions (1.0%) than in public institutions (4.8%)

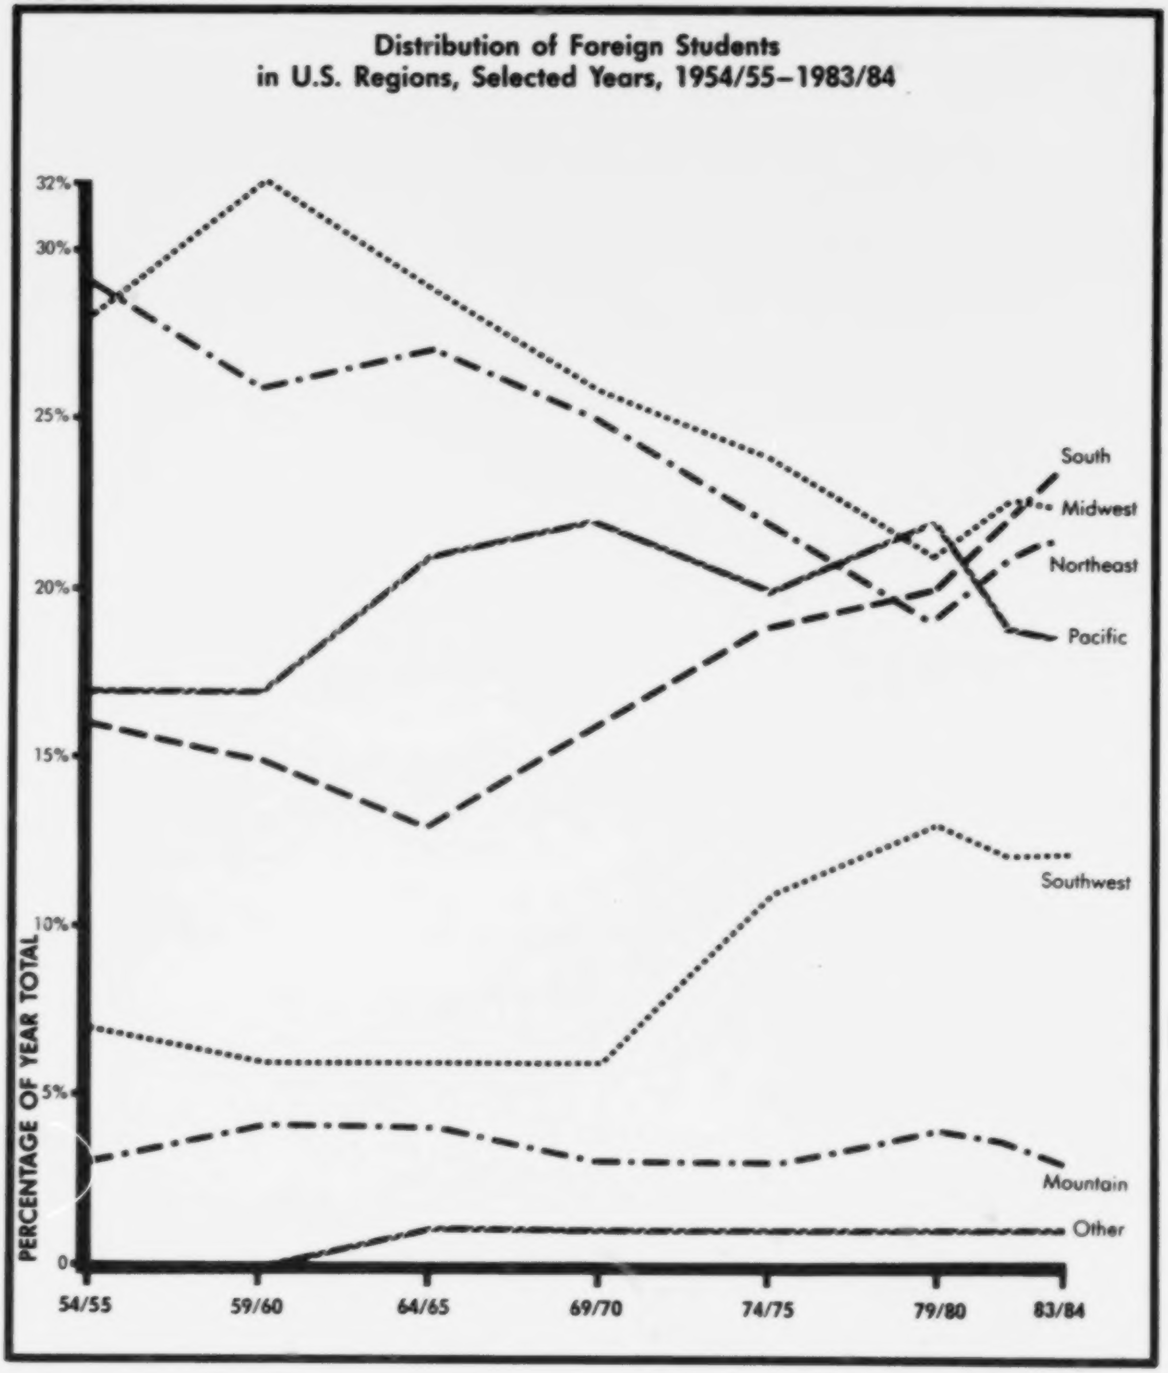
5. DISTRIBUTION OF FOREIGN STUDENTS BY STATE

FIGURE 5A



Regions of the United States

For the first time in the history of the Census, more foreign students were enrolled in Southern institutions than in institutions in other regions of the United States. With reported enrollments of 75,759 (**Table 5.0**), the South was followed closely by the Midwest (75,723 students) and the Northeast (70,587). The Mountain region remained in fourth place with 61,645 students, but it and the Pacific region reported declines in their foreign-student enrollments: 4.6% in the Mountain region, and 5.2% (10,819 students) in the Pacific. Excluding students in the "other" category, the Southwest reported the largest percentage increase (4.1%) in enrollments, with a total of 42,717 students.

Foreign students were concentrated in and fairly evenly distributed among the more populous regions of the United States, with 83.7% almost equally divided among the Northeast, South, Midwest, and Pacific regions (**Table 5.1**). The Southwest had 12.6% and the Mountain region 3.2% of all foreign students. (See **Appendix 5** for the list of states within each region.)

Foreign students have not always been so evenly distributed in the United States. From 1954/55 to 1969/70 more than one-half of all foreign students studied in the Northeast and Midwest, with almost one-third (31.8%) studying in the Midwest in 1959/60. **Figure 5A** shows how these percentages and the relative rankings of the regions have changed over the years. For the first 20 years of the Census, these rankings were virtually unchanged. Then in the latter 1970s, enrollments and rankings fluctuated often. The Pacific region, third in enrollments for many years, had the most foreign students as recently as 1980/81, then dropped to fourth place by 1982/83. Meanwhile, enrollments in the fourth-ranked South grew rapidly, enabling this region to edge out the Midwest for first place in 1983/84.

Although foreign students as a whole were evenly distributed among the more populous U.S. regions, enrollments from the seven world regions varied considerably (**Table 5.2** and **Figure 5B**). Students from Africa and Latin America enrolled in Southern institutions in much higher proportions (30.4% and 39.1%, respectively) than the region's 22.4% average, while relatively few chose the Pacific region (8.3% and 8.7%, respectively) compared to its 18.2% average. More than one-third of all Europeans (34.2%) chose institutions in the Northeast, compared to 20.8% of all foreign students.

Middle Eastern and, to a lesser extent, South and East Asian students were distributed in U.S. regions in proportions close to those for all foreign students. North Americans, who are primarily Canadians, clustered in the regions close to the border, with 28.7% in the Northeast, 28.5% in the Midwest, and 7.9% (compared to an average of only 3.2%) in the Mountain region. Students from Oceania also appeared to be influenced by geography; 38.6% of these students enrolled in schools in the Pacific region.

There were marked differences in regional preference of as much as ±10% among the 15 leading countries of origin, as shown in **Table 5.3**. In the Northeast, which had a 20.8% share of the foreign-student body, some of the countries with large variations in enrollment were Malaysia (9.1%), India (29.8%), Saudi Arabia (8.8%), and China (32.0%). Five countries had large variations to the South's 22.4% overall share: Nigeria (34.8%), Canada (11.2%), Venezuela (39.9%), Hong Kong (8.1%), and China (10.8%).

Students from Malaysia (46.4%) and Jordan (32.8%) showed a greater preference for the Midwest than the average for that region (22.3%), while the Pacific region, with 18.2% of all foreign students, had disproportionately large shares of students from Japan (33.5%) and Hong Kong (36.6%) and relatively small shares of students from Nigeria (5.4%), India (8.7%), and Venezuela (8.2%).

Another way to view distributional patterns of foreign students in the United States is to examine region-of-origin breakdowns for each U.S. region. These data are given in **Table 5.4** and illustrated in **Figure 5C**.

The higher proportion of Europeans who chose to study in the Northeast is again evident (15.6% of all students in that region, compared to their 9.4% share of the U.S. foreign-student total), as is the higher proportion of Latin Americans in the South (28.0% compared to 15.5%). The Pacific region had a larger-than-average share of South and East Asians (49.9% compared to 39.0%), and lower proportions of Africans (5.8%) and Latin Americans (7.7%) than U.S. averages (12.3% and 15.5%, respectively). As previously noted, the

Mountain region had a relatively large share of North Americans (12.2%) compared to the U.S. average (4.6%).

Distribution of Foreign Students by State

The number of foreign students reported in 1983/84 in each U.S. state and territory is listed in **Table 5.5**, along with figures for 1982/83 and the percentage change. The distribution among states is illustrated in **Figure 5D**.

The slight increase of 0.6% in foreign students from 1982/83 to 1983/84 was not consistently reflected among the states and territories. Guam, New Hampshire, and Mississippi showed substantial percentage increases in foreign-student enrollments (52.3%, 39.6%, and 20.8%, respectively), while Texas showed the largerst numerical increase, with 1,692 more students in 1983/84. California lost the most foreign students (2,469 fewer than in 1982/83), but the largest percentage decreases were reported by Vermont and Delaware (25.6% and 13.4%, respectively).

Figure 5E graphs the percentage share of the six states with the largest enrollment in 1983/84 and looks at that share over the 30-year Census period. Although California experienced the largest decrease in enrollment in 1983/84, it retained first place as the state with the most foreign students, a position it has held since 1957/58. There have been no changes in the rankings of the states with the highest foreign-student enrollments since 1980/81, when New York moved from third place to second, Texas dropped to third, and Florida jumped from sixth to fourth with a dramatic 36.4% increase in foreign students.

The 10 states with the most foreign students are listed in **Table 5.6** for five-year intervals since 1954/55. Nine of the states have been on the list each year since the Census began, and the list has not changed since 1966/67, when Florida replaced Indiana, although rankings have varied. **Table 5.6** also shows the 10-state total enrollment for each year listed and the percentage it represents of total reported foreign-student enrollment for that year. This percentage declined from 64.1% in 1954/55 to 59.0% in 1979/80, hovering since then at around 59% and suggesting that foreign students are slightly more dispersed among the states in recent years than when the Census began.

Table 5.7 shows the distribution of foreign students from the leading countries of origin among the 10 states with the highest enrollments, as well as state and U.S. totals. Data in this table are charted in **Figure 5F**.

California, with 13.9% of all foreign students in 1983/84, had disproportionately large shares of students from Iran (21.3%), Japan (21.4%), and Hong Kong (23.3%), but relatively few of the students from Nigeria (4.2%), India (6.7%), and Venezuela (6.7%). New York, which had 8.7% of all foreign students, had a larger percentage of Indians (11.9%) than the other leading states.

Other notable variations were higher proportions of Nigerians (15.4%) in Texas. Venezuelans (19.8%) in Florida, Malaysians (12.4%) in Illinois, and Canadians

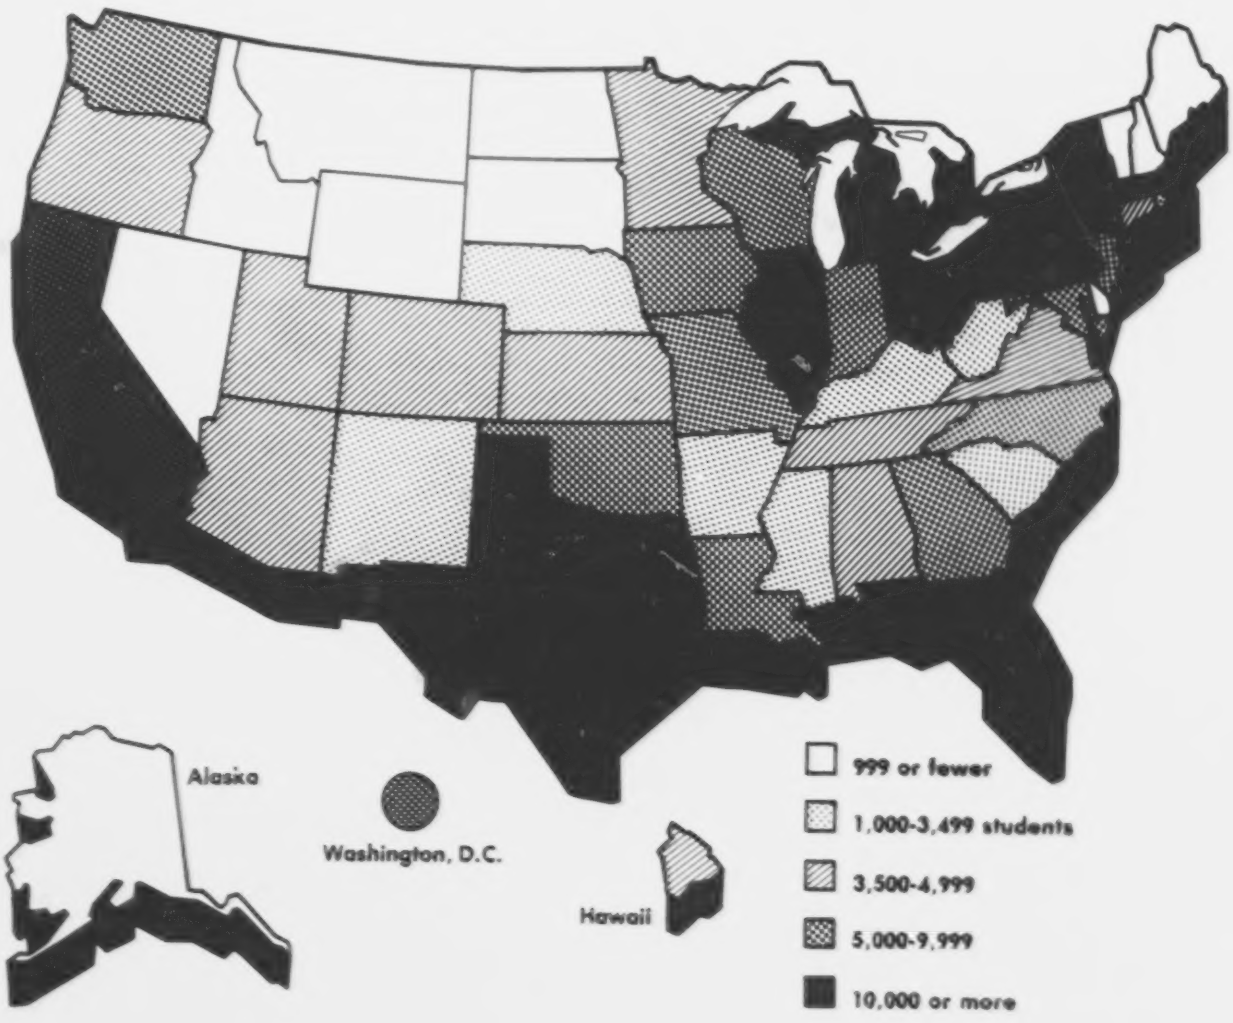

FIGURE 5E

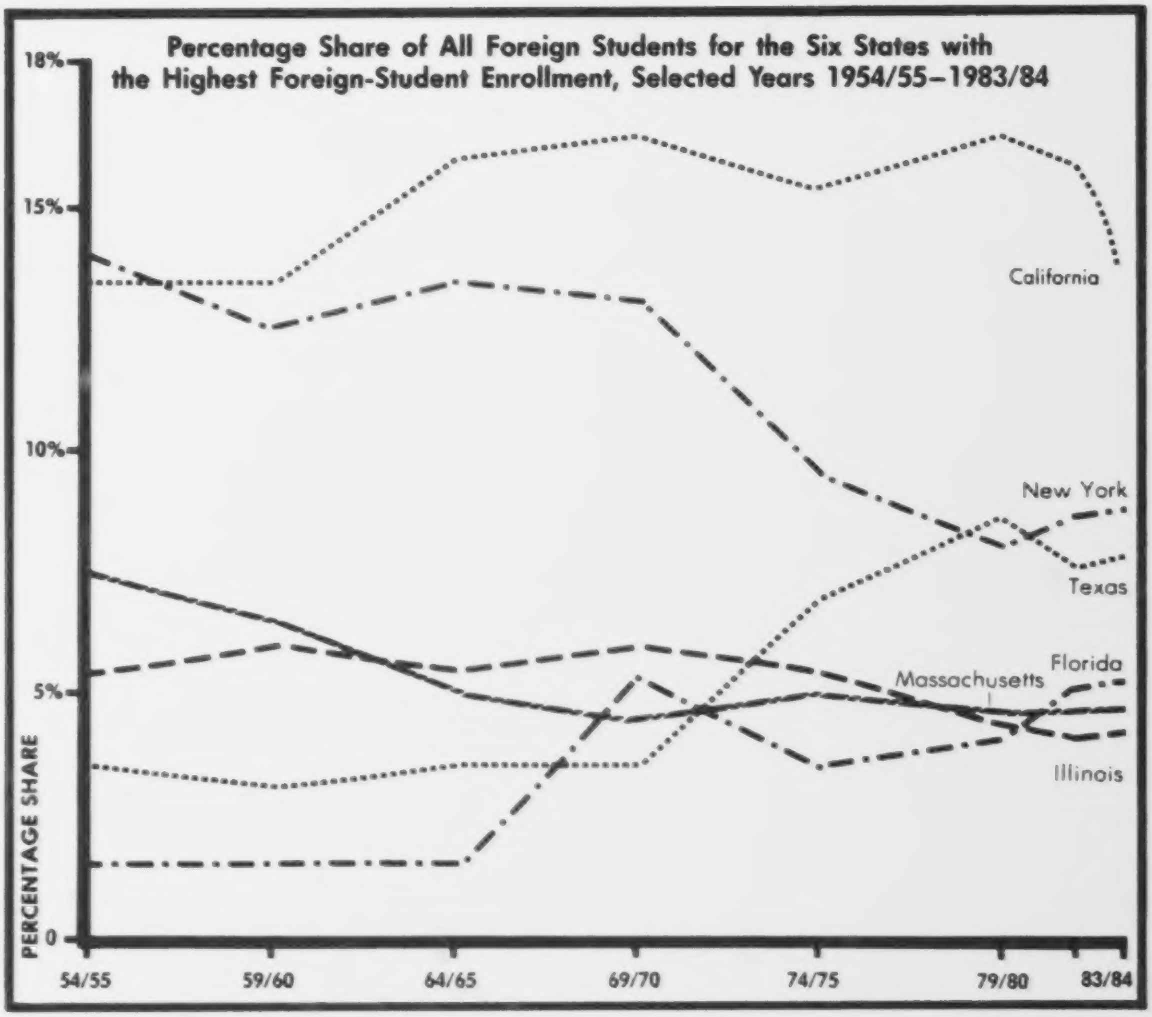

Percentage Share of All Foreign Students for the Six States with the Highest Foreign-Student Enrollment, Selected Years 1954/55–1983/84

(14.4%) in Michigan than the total proportion of foreign students in those states.

The number of nationalities of foreign students and the total enrolled in each state are shown in **Table 5.8**. Not surprisingly, of the 191 countries and territories that sent students to the United States, 160 were represented in California, the state with the highest foreign-student enrollment (47,246); the second leading host state, New York (29,546 foreign students) followed closely with 159 nationalities reported. There were 150 nationalities among Michigan's 12,410 foreign students, 147 in Massachusetts (16,428 students) and the District of Columbia (10,596), and 146 in Texas (28,269). Other states with high foreign-student enrollments also had large numbers of reported nationalities: among 11,640 students in Pennsylvania, 145 nationalities were reported; in Florida there were 17,918 students of 142 nationalities, and in Illinois, 141 nationalities were represented among the 14,246 students.

Several states with foreign-student enrollments of less than 5,000 had large numbers of reported nationalities: Arizona had 128; Minnesota, 126; Alabama, 124; Kansas, 120; and Maine reported 71 nationalities among only 382 foreign students.

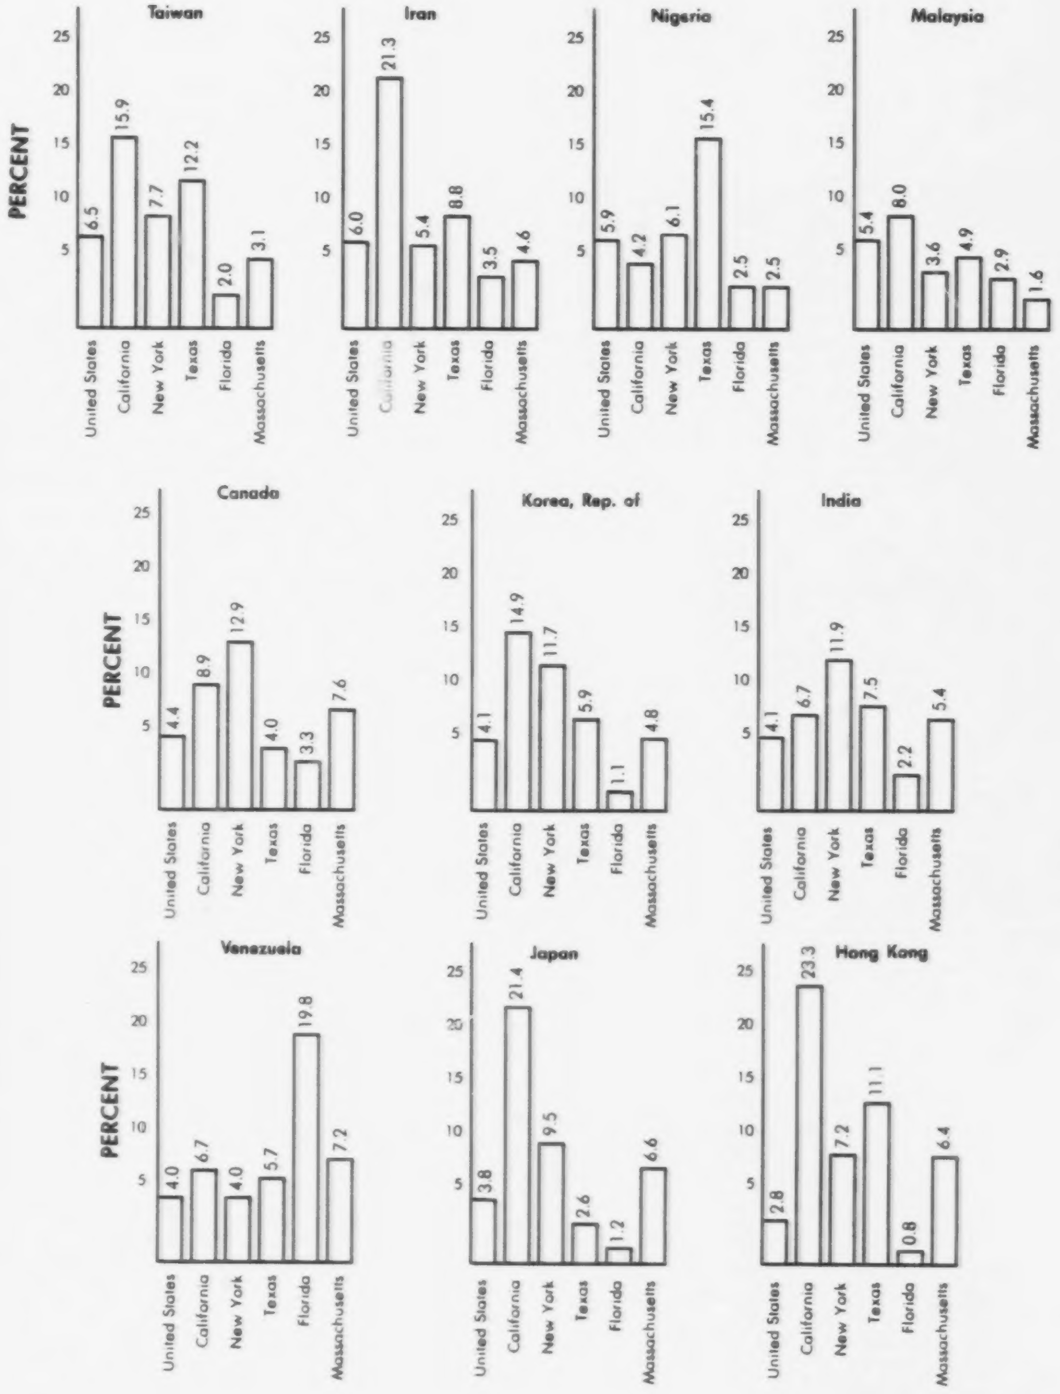
FIGURE 5F

Distribution of Students from the 10 Leading Countries of Origin in the States with the Highest Foreign-Student Enrollments, 1983/84



6. DISTRIBUTION IN TWO- AND FOUR-YEAR INSTITUTIONS

Compared with the total U.S. student enrollment, a much higher proportion of foreign students attend four-year institutions. In 1983/84, 295,557 or 87.2% foreign students were enrolled in four-year institutions, compared to a total U.S. student proportion of 60.7% (**Figure 6A**).

IIE first tabulated data on two-year institutions in 1970/71. As shown in **Table 6.0**, the percentage of foreign students enrolled in two-year institutions rose steadily to a peak in 1980/81 of 17.4%, but declined to 12.8% by 1983/84. In contrast, the percentage of all students enrolled in two-year institutions has continued to climb, from 26.0% in 1970/71 to 39.3% in 1983/84.

Table 6.1 lists the number and percentages of foreign students in two- and four-year institutions for each state; it is illustrated in **Figure 6B**. Several states and territories reported much larger percentages of foreign students in four-year institutions than the 1983/84 average: the District of Columbia, Rhode Island, and the Virgin Islands (100.0% each), South Dakota (99.9%), West Virginia (99.6%), Puerto Rico (99.0%), Montana and Vermont (98.9% each), and New Hampshire (98.5%). States with significantly larger percentages of two-year students were Florida (41.1%), Idaho (37.0%), and Maryland (30.4%).

Three-year comparisons of the distribution of foreign students from leading countries of origin in two- and four-year colleges are provided in **Table 6.2**.

While African students as a whole enrolled in four-year schools in greater-than-average proportions, a large proportion of students from Ethiopia enrolled in two-year institutions (19.8% in 1983/84). Students from throughout Europe favored four-year institutions, while Latin Americans, with the exception of students from Brazil, enrolled in two-year institutions in above-average proportions.

At the regional level, enrollment patterns from the Middle East closely matched total foreign-student proportions in two- and four-year institutions. However,

Virgin Islands	—	—	—
TOTAL	**47,912**	**43,337**	(9.5)

among the leading countries in the region, Jordan and Kuwait showed consistently higher-than-average and Iran lower-than-average proportions enrolled in two-year schools.

Relatively few students from North America enrolled in two-year institutions in the last three academic years. In contrast, enrollment proportions from Oceania in two-year institutions were close to the average.

In South and East Asia, worth noting is Japan's 15.5% proportion of students in two-year institutions in 1983/84; while approximating the foreign-student average of 12.8%, this was almost double the regional average of 8.3% and far above proportions from South and East Asia's other leading countries.

Table 6.3 lists the distribution of students from OPEC countries in two- and four-year institutions from 1981/82 to 1983/84. As a group, these countries sent 13.3% of their students to two-year schools in 1983/84, a slightly higher proportion than the average. In 1983/84, substantially greater proportions of students from Algeria (99.6%) and Gabon (97.1%) enrolled in four-year institutions than the OPEC average of 86.7%. Qatar (30.9%), Venezuela (24.8%), Kuwait (23.4%), and the United Arab Emirates (22.9%) sent substantially greater proportions to two-year institutions than the OPEC average of 13.3%.

Two-Year Institutions

The number of foreign students in two-year institutions in 1983/84 was 43,337, a decrease of 4,575 or 9.5%. As indicated in **Table 6.4**, these students were unevenly distributed among the states. Eleven states or territories each had more than 1,000 two-year students, 24 had between 100 and 1,000, 16 had less than 100, and three had none. Thirty-six states and territories showed a decrease in the number of two-year foreign students, 15 showed an increase, and three showed no change.

The states with the largest numerical losses in foreign-student enrollment in two-year institutions were California, which lost 2,363 students; Michigan, 748 students; Maryland, 432 students; and Washington, 406 students. South Dakota (−75.0%) and West Virginia (−50%) showed the largest percentage declines, though in real numbers this represented enrollment losses of from 4 to 1 and 12 to 6, respectively. The largest increases in enrollment in two-year institutions occurred in Florida, which gained 280 foreign students; Texas, 179 students; and Colorado, 172 students. Hawaii (61.4%) and Maine (50.0%) showed sizable percentage increases. The 10 states with the largest two-year enrollments accounted for nearly three-quarters of all foreign students in two-year institutions (**Table 6.5**).

Table 6.6 lists the two-year institutions reporting the largest enrollments of foreign students in 1983/84 and compares these with 1982/83 figures. Though there

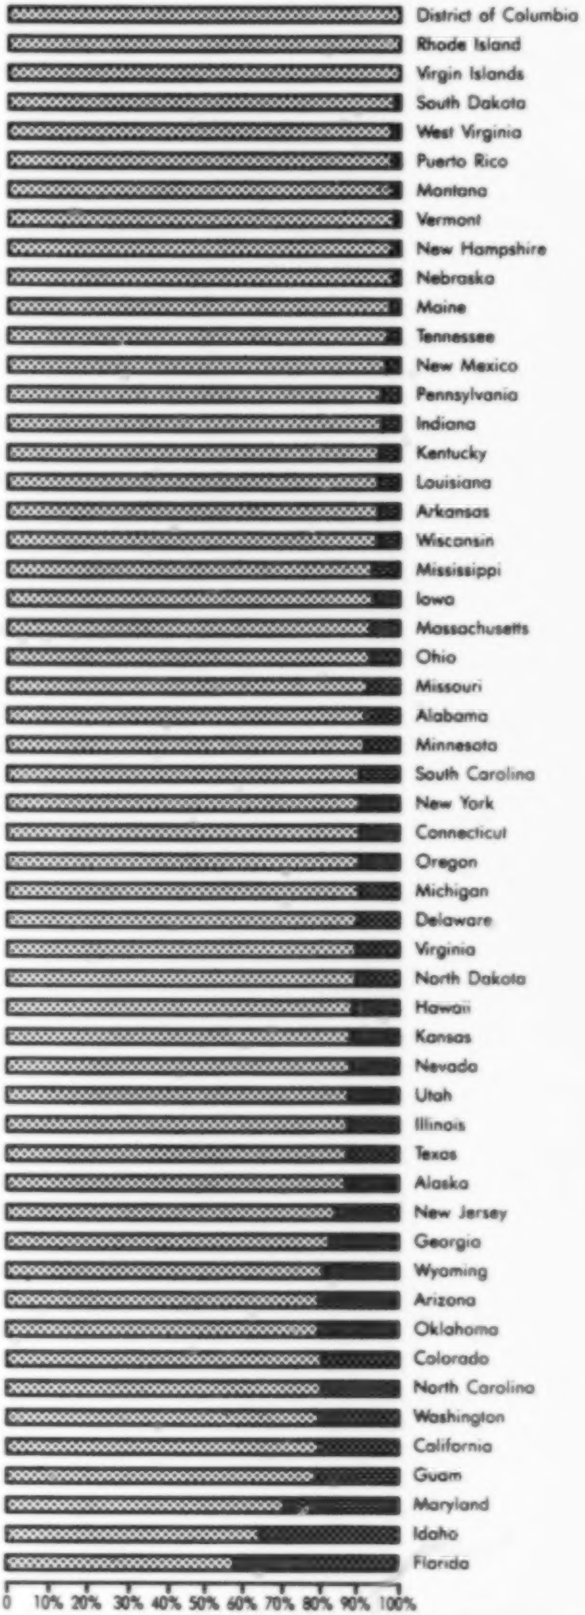
Distribution by State of Foreign Students in Two- and Four-Year Institutions, 1983/84*



* *Ranked by percentage of foreign students enrolled in four-year institutions.*

were several changes, Miami-Dade Community College again reported the most foreign students, 4,388, or a 4.8% increase over its 1982/83 enrollment of 4,186. Miami-Dade had more than four times the foreign-student enrollment reported by second-ranked Prince George's Community College (818 students).

Santa Monica College, second in 1982/83, ranked third with a 14.0% decrease in enrollment. Loop College moved from fifth place to fourth and Central Piedmont Community College climbed from eighth to sixth place. New to the list in 1983/84 were Los Angeles City College (ranked fifth), and Pasadena City College, Oklahoma City Community College, Austin Community College, and Broward Community College (ranked seventh through tenth).

As in previous years, the 10 largest institutions continued to account for a substantial proportion, 23.1%, of foreign students in two-year institutions. Miami-Dade Community College alone accounted for 10.1%.

TABLE 6.8

States with the Highest Foreign-Student Enrollment in Four-Year Institutions, 1983/84

State	Foreign Students	Percentage of All Four-Year Foreign Students
California	37,284	12.6
New York	27,173	9.2
Texas	24,666	8.4
Massachusetts	15,368	5.2
Illinois	12,495	4.2
Pennsylvania	11,284	3.8
Ohio	11,246	3.8
Michigan	11,226	3.8
District of Columbia	10,596	3.6
Florida	10,547	3.6
TOTAL, 10 HIGHEST	171,885	58.2

Four-Year Institutions

Foreign students in four-year institutions in 1983/84 numbered 295,557, a 2.2% increase over the 289,073 students reported in 1982/83. Their distribution ranged from 170 in the Virgin Islands to 37,284 in California. Ten states or territories had more than 10,000 foreign students in four-year institutions, 30 had between 1,000 and 10,000, and 14 had fewer than 1,000.

Data from 1982/83 and 1983/84 (**Table 6.7**) show that 16 states or territories reported declines in enrollment and 37 reported increases, while one showed no change. States showing the greatest numerical decreases in foreign students were Wisconsin, with a loss of 518 students; Utah, a loss of 491; Washington, 372; Kansas, 352; and Colorado, 330. Vermont and Utah showed the largest percentage decreases (25.9% and 13.4%, respectively). States and territories with the largest increases in foreign students in four-year institutions were Texas, with 1,513 more enrollees; Pennsylvania, adding 837; Illinois, 566; New York, 545; and Alabama and Indiana, adding 464 each. Those showing large percentage increases were: Guam (63.5%), New Hampshire (39.7%), and Mississippi (25.5%). As **Table 6.8** shows, nearly three-fifths (58.2%) of foreign students in four-year schools were concentrated in the 10 states with the largest enrollments.

Table 6.9 ranks the 10 four-year institutions reporting the greatest enrollments of foreign students in 1983/84 and compares these figures with 1982/83 data. Though rankings changed, the same schools predominated both years, led by the University of Southern California with 3,752 foreign students in 1983/84. The University of Texas at Austin retained second place with 3,236 students; the University of Wisconsin at Madison moved from fourth to third place with a foreign enrollment of 2,775. Southern Illinois University at Carbondale reported the largest proportional increase in foreign-student enrollment, 12.0%. The 10 largest institutions continued to account for just under 10% of all foreign students enrolled in four-year schools.

TABLE 6.9

Four-Year Institutions with the Highest Foreign-Student Enrollments, 1982/83–1983/84

Rank		Institution	Foreign Students		Percentage Change
1982/83	1983/84		1982/83	1983/84

7. DISTRIBUTION IN PUBLIC AND PRIVATE INSTITUTIONS

In 1983/84 nearly two-thirds of all foreign students were enrolled in public institutions, a proportion unchanged significantly in the last several years. Public- and private-institution enrollment ratios between foreign students and the total U.S. student population have differed consistently since 1975/76; more than three-quarters of all students in the United States have chosen public institutions (**Table 7.0**). In 1983/84 that comparable figure for foreign students was 65.0% (**Figure 7A**).

Proportions of foreign students in public institutions varied widely from state to state, from over 95% in five states and territories to 11.5% in the District of Columbia (**Table 7.1**). In addition to the District of Columbia, two states had high proportions of foreign students in private schools: Massachusetts (83.6%) and New Hampshire (81.9%). Eight states or territories reported more than 90% of their foreign students enrolled in public institutions: Wyoming, Guam, and the Virgin Islands (100% each), Nevada (98.4%), North Dakota (96.9%), New Mexico (93.9%), Arizona (93.1%), and Delaware (92.3%). The data in **Table 7.1** are illustrated in **Figure 7B**, which ranks the states in descending order by percentage of foreign students in public schools.

The proportion of foreign students in public and private institutions from leading countries of origin within major world regions is shown in **Table 7.2** for 1981/82 to 1983/84. At the regional level, enrollment ratios of students from Africa, Latin America, and South and East Asia were similar to the foreign-student average. Proportionally more European, North American, and Oceanian students were enrolled in private schools, while a larger-than-average proportion of Middle Eastern students enrolled in public institutions.

The two countries with the most foreign students in the United States, Taiwan and Iran, showed some of the highest percentages of students in public institutions. Malaysia led with 80.4% of its students in public institutions in 1983/84; that proportion has grown steadily over the last few years.

Four countries had more students enrolled in private institutions than in public in 1983/84: Italy (60.0%),

Canada (55.8%), France (53.6%), and Jamaica (50.8%). Other leading countries with relatively high proportions of students in private institutions were the United Kingdom (47.6%), Japan (45.1%), and Kuwait (42.7%).

A slightly higher-than-average proportion of students from OPEC nations were enrolled in public institutions in 1983/84. As shown in **Table 7.3**, Iran led with 75.5% of its students in U.S. public institutions, an increase from 1981/82. Four OPEC countries had relatively high proportions (over 40%) of their students in private institutions: Gabon (88.2%), Algeria (51.3%), Kuwait (42.7%), and the United Arab Emirates (41.9%).

Public Institutions

The number of foreign students reported by U.S. public institutions rose 0.6% in 1983/84 to a total of 220,274. Five states had more than 10,000 foreign students enrolled in public institutions, 33 states and the District of Columbia had between 1,000 and 10,000 students, and 15 states and territories had fewer than 1,000. The largest increases in enrollment occurred in Texas, with an additional 1,960 students; Illinois, with 568 more; and Alabama, 528. The largest percentage increases were in Guam (52.3%), the District of Columbia (32.4%), and Mississippi (25.4%).

California had the largest decline in foreign-student enrollment in public institutions, a loss of 2,500 students. Wisconsin and Washington lost 477 and 444 students, respectively. The largest percentage decrease occurred in Delaware (down 14.7%).

Nearly one-quarter of these foreign students were enrolled in California (28,472 students) and Texas (24,028), as shown in **Table 7.5**. Substantially smaller numbers of students were enrolled in schools in the eight next-largest states, ranging from 12,452 in Florida to 5,426 in Pennsylvania. Together these 10 states enrolled 57.5% of all foreign students in public institutions in the United States.

The public institutions with the highest foreign-student enrollments in 1983/84 are listed in **Table 7.6** and compared to 1982/83 schools. Miami-Dade Community College retained first place with 4,388 foreign students reported, followed by the University of Texas at Austin (3,236 students) and the University of Wisconsin at Madison (2,775). The institutions reporting the greatest proportional growth in enrollment were the University of Houston-University Park (15.5%) and North Texas State University (15.1%), both new to the list in 1983/84. Together the top 10 institutions accounted for 12.2% of all foreign students enrolled in public institutions.

Private Institutions

Foreign students reported by private institutions in 1983/84 numbered 188,620, an increase of 0.5% from 1982/83. As **Table 7.7** shows, this growth was varied among the states and territories.

New York experienced the greatest numerical increase in private-school students, with 907 more foreign students in 1983/84. Pennsylvania was second in growth with 269 additional students, followed by Connecticut (250 more students), Massachusetts (244 more), and

TABLE 7.5

States with the Highest Foreign-Student Enrollments in Public Institutions, 1983/84

TOTAL	118,045	118,620	0.5

New Hampshire (243). New Hampshire showed the largest percentage increase, 52.9%. Washington posted the largest decrease in enrollment with a loss of 334 students, followed closely by Utah, which lost 332 foreign students in its private schools. Several states showed large percentage decreases: Nevada (61.9% fewer students), South Carolina (−44.2%), North Dakota (−41.7%), and Alaska (−41.3%). Nationwide, 25 states and territories showed increases in foreign-student enrollment in private schools, 26 had declines, and three showed no change.

The 10 leading states enrolled 71.5% of all foreign students in private institutions (**Table 7.8**), whereas nine states or territories had fewer than 100 or none.

Table 7.9 lists the private institutions enrolling the most foreign students in 1982/83 and 1983/84 and highlights even more their disparate national distribution: four of the leading institutions are in the Boston area, two in New York City, and two in the District of Columbia. The same 10 schools appear in both academic years.

The University of Southern California continued to enroll the most foreign students, with 3,752 in 1983/84, a 2.8% increase. Although Columbia University and George Washington University reported enrollment declines in 1983/84 (−5.9% and −0.8%, respectively), they remained in second and third place. Boston University again was fourth with a 7.9% increase, the highest proportional gain of the 10. Massachusetts Institute of Technology moved into fifth place from ninth with a 5.7% rise in enrollment.

The 10 leading private institutions showed a greater proportion of foreign students (19.7%) than the 10 leading public institutions (12.2%). Both proportions represent a slight increase over 1982/83.

TABLE 7.8

States with the Highest Foreign-Student Enrollments in Private Institutions, 1983/84

8. INSTITUTIONS WITH THE MOST FOREIGN STUDENTS

In 1983/84, 75 institutions in the United States reported enrolling 1,000 or more foreign students (**Table 8.0**), in contrast to only one institution in 1954/55. These institutions enrolled 130,491 foreign students, 38.5% of the foreign-student population in the United States. Foreign-student enrollment as a proportion of total enrollment varied from a low of 3.5% at Arizona State University to a high of 55.7% at Northrop University, with an institutional average of 7.1%.

The proportion of foreign students enrolled in leading institutions has been relatively stable in recent years (**Table 8.1**), following a downward trend that began in the 1960s. In 1959/60, the 10 leading institutions reported 22.8% of all foreign students. By 1980/81, the top 10 institutions accounted for only 8.3%; this proportion rose to 8.6% in 1983/84.

For most of the years reported in **Table 8.2**, the 10 institutions reporting the largest number of foreign students have remained fairly stable—seven of the 10 institutions listed in 1954/55 appear on the list in 1974/75. Greater changes occured in the last few years, leaving only four of the original 10 institutions consistently included: the University of Southern California, Columbia University (including Barnard and Teachers College), the University of Wisconsin, Madison, and the University of Michigan, Ann Arbor.

While the overall proportion of foreign students enrolled in U.S. institutions of higher education was 2.7%, a number of institutions with 1,000 or more foreign students had much higher concentrations of these students. Leading institutions appear in **Table 8.3**; the enrollment proportions of the top 10 are illustrated in **Figure 8A**. The foreign-student enrollment in each institution surveyed is listed in **Appendix 1**.

Among the 10 institutions enrolling the most foreign students, six appear in **Table 8.3** with high percentages of foreign students: George Washington University, the University of Southern California, Southern Illinois University, Carbondale, Columbia University, Boston University, and Miami-Dade Community College.

The 20 institutions reporting 100 or more nationalities among their foreign students are listed in **Table 8.4**. Boston University, which ranked 10th in number of foreign students, reported the most nationalities, 116. The University of Wisconsin, Madison, fourth in foreign-student numbers, was second in number of nationalities, with 114 reported. These institutions were followed by the University of Southern California (113 nationalities), the University of Maryland, College Park, and the University of Minnesota, Twin Cities (111 each). Two institutions reported enrolling students from 110 countries and territories, two reported 108, and an additional 11 reported 100 or more nationalities in their foreign-student bodies.

Part II: EXPENDITURES FOR LIVING COSTS BY FOREIGN STUDENTS IN THE UNITED STATES

These calculations of the estimated expenditures for living costs by foreign students in the United States are based on information from two sources: (1) the number of foreign students reported for 1983/84 in the Annual Census and (2) the recommended Monthly Maintenance Rates for 1984/85 published by the Institute of International Education.

The Monthly Maintenance Rates (MMR) for foreign students are figures that IIE calculates for each U.S. institution of higher education, based on guidelines established by an advisory committee comprising representatives from universities, foundations, and government. These rates enable universities, government, and organizations sponsoring foreign-student programs to set allowances for foreign students. MMRs have been published by IIE since the 1950s. (See *Costs at U.S. Educational Institutions*, New York: Institute of International Education, annual.)

The MMR calculations are based upon the Bureau of Labor Statistics estimates of intermediate-level family budgets and comparative indexes of prices in selected urban areas, with adjustments to reflect inflation and special foreign-student needs. Since living costs vary in different regions of the United States and between urban and nonmetropolitan areas, IIE has located each institution within its appropriate geographical area—thereby providing it with a specific MMR. *It should be noted that the MMR is for living costs only*; it does not include expenditures for tuition, fees, books, insurance, special equipment, travel, or dependents.

For this section of *Open Doors*, two tables have been produced. **Table 9.0** uses the average estimated MMR for the entire United States for 1984/85 ($620), multiplies it by nine (representing a nine-month academic year), and multiplies that number by the number of foreign students reported in each state. This gives an estimate of the cumulative expenditures for living costs by foreign students in each state. **Table 9.1** provides similar calculations of living costs for metropolitan areas using the specific MMR for each area. **Figure 9A** illustrates the estimated expenditures by foreign students in the 10 states with the highest such figures.

* Estimated expenditures are base on the number of foreign students reported in academic year 1983/84, multiplied by the metropolitan area's monthly maintenance rate for academic year 1984/85 multiplied by nine months.

Part III: INTENSIVE ENGLISH LANGUAGE PROGRAMS

Background

Five years ago, at the request of the Interassociational Committee on Data Collection (ICDC), IIE conducted an exploratory survey to determine the number of nonimmigrant foreign students enrolled in intensive English language programs (IELPs). The results of that survey, detailed in *Open Doors: 1978/79*, indicated that a significant number of foreign students were enrolled in IELP institutions. Since it was felt that these students constituted a substantial pool for entry into full-time academic programs, the ICDC urged establishment of an annual survey of IELP institutions to monitor any major changes.

The Survey

Using *English Language and Orientation Programs in the United States* (New York: Institute of International Education, 1982) as a directory of IELP institutions, IIE surveyed 393 programs offering a minimum of 15 hours of classroom instruction per week. (**Appendix 8** lists the IELP institutions surveyed.) Each program was asked to report, as of the fall of 1983, the total number of foreign students enrolled, their sex, visa type, reporting status, and country of citizenship.

Results

IIE received 332 responses to the survey. A total of 308 institutions reported enrolling foreign students in intensive English language programs; of these, six reported offering summer programs only. Eight institutions reported having no foreign enrollment.

Table 10.0 summarizes the basic results of the 1983/84 survey with comparable results from the five previous surveys. The number of programs reporting a foreign-student enrollment decreased 1.9% to 308 in 1983/84 and the number of foreign students reported in IELPs decreased from 30,135 in 1982/83 to 25,246, a 16.2% drop. This followed a 6.5% decrease in the previous survey, illustrated in **Figure 10A**.

IELP programs that also reported their students in the Annual Census decreased in number by 3.7% to 157 in 1983/84 (**Table 10.1**). They reported 2,154 fewer students (−16.7%). The number of programs that were reported only in the IELP survey (151) remained the same, but they reported a 15.9% decrease in enrollment or 2,735 fewer students.

The intensive English language programs reporting the highest foreign-student enrollments are listed in **Table 10.2**. The 10 largest enrolled 4,287 students (17.0%); the 25 largest enrolled 7,663 students (30.4%).

Table 10.3 lists the states reporting the highest number of IELP students. Included are eight of the states with the highest foreign-student enrollments (see **Table 5.6**), with Louisiana and Hawaii replacing Pennsylvania and the District of Columbia. Only two states, Massachusetts and Hawaii, reported increases in IELP students over 1982/83 (of 4.1% and 32.0%, respectively). Four of the states (New York, Florida, Louisiana, and Ohio) experienced declines of more than 20%.

The 44 states plus the District of Columbia reporting foreign students in IELP programs are listed in

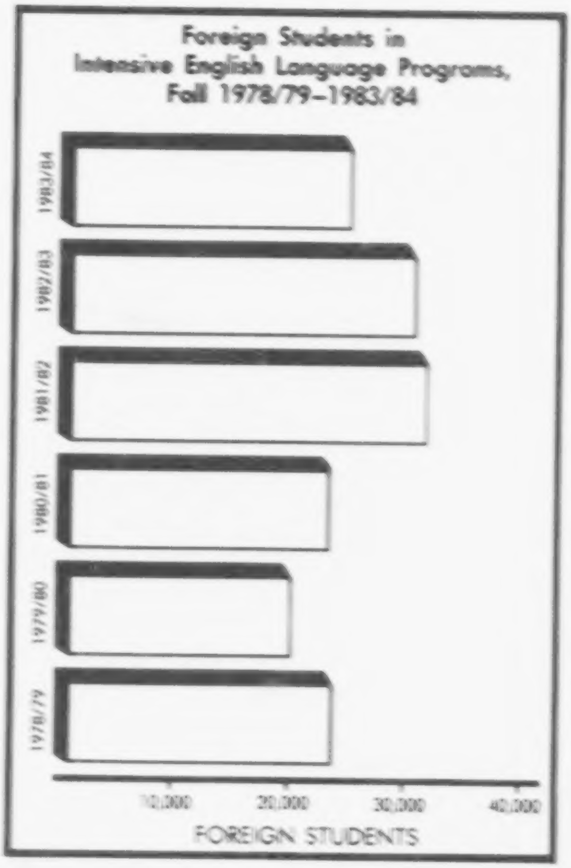
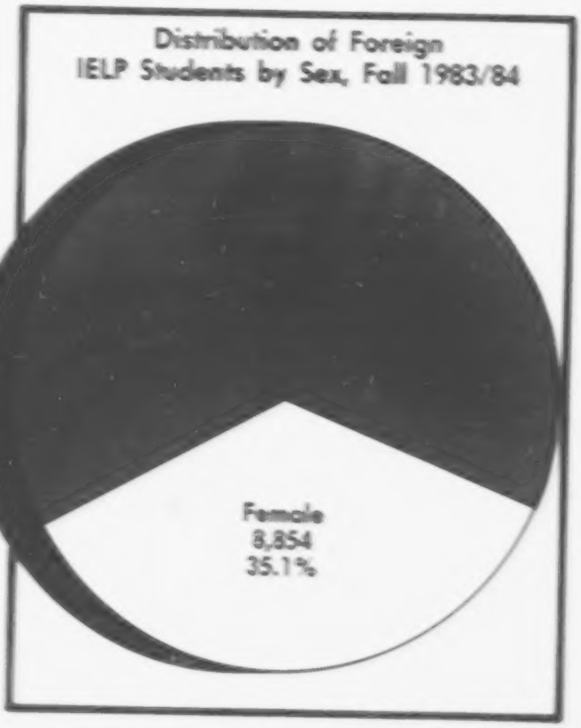
FIGURE 10A



Foreign Students in Intensive English Language Programs, Fall 1978/79–1983/84

FIGURE 10B



Distribution of Foreign IELP Students by Sex, Fall 1983/84

Table 10.4. Listed separately are the number of students included in the Annual Census and those counted only in the IELP survey.

The countries sending the largest number of IELP students in 1983/84 represent a substantially different distribution than the leading countries of origin reported in the Annual Census (see **Table 2.5**). Countries such as Nigeria, Canada, Hong Kong, India, and Iran do not appear in **Table 10.5**; six of the 10 leading countries of origin for IELP students are South and East Asian countries, three are Latin American countries, and one (Saudi Arabia) is Middle Eastern.

Student numbers from six of these countries decreased, with Taiwan showing the only large increase (58.0% and 384 students). These 10 countries represented 56.3% of all IELP students reported.

Table 10.6 shows the distribution by region of origin of IELP students in 1982/83 and 1983/84 and illustrates again the dominance of students from South and East Asia. Nearly 45% of all IELP students come from this region in 1983/84, and an additional 45% come from Latin America and the Middle East.

The percentage of male and female students among IELP students is illustrated in **Figure 10B**. There was a substantially higher proportion of women (35.1%) among IELP students than among foreign students reported in the Annual Census (29.4%). The proportion of female IELP students decreased slightly from the 35.6% reported in 1982/83.

Table 10.7 shows the visa type of IELP students. The proportions of IELP students holding F and J visas in 1983/84 were somewhat lower than the proportions for all forein students (see **Table 4.6**), while the proportions of refugees and those holding M or other visas were slightly higher, and also represented slight increases over their proportions among IELP students in 1982/83.

Part IV: U.S. COLLEGE-SPONSORED STUDY-ABROAD PROGRAMS

Background

For a number of years, Open Doors included data from a survey of U.S. students studying abroad, based on questionnaires sent to foreign institutions. This survey was discontinued after the 1973 edition of Open Doors due to declining response.

However, recognizing the continued interest in the flow of U.S. students overseas, in 1977/78 IIE identified one group of U.S. students—those enrolled for the academic year in U.S. college-sponsored study-abroad programs—and collected data supplied by those program sponsors. These data have been updated on an annual basis since they were first reported in Open Doors: 1978/79.

It should be emphasized that the data in this section result from a survey of only one of many groups of U.S. students studying abroad. Other groups not surveyed include those in programs sponsored by overseas universities, those in summer study programs, and students in independent programs.

The Survey

As part of the preparation of the yearly publication *U.S. College-Sponsored Programs Abroad: Academic Year*, IIE asks each program sponsor to provide the number of students who participated in the previous year, as well as information on the nationality, field of study, and male/female ratio of these students.

For Open Doors, IIE compiles these data to provide the reader with two sets of information: (1) tables describing the geographical distribution of the students reported and (2) tables describing the field-of-study offerings.

The data collected, giving the number of students in a program (which usually includes several fields of study), do not permit the correlation of numbers of students and fields of study. The survey response is tabulated in **Appendix 9**.

Geographical Distribution of Study-Abroad Students

In 1982/83, U.S. college-sponsored study-abroad programs reported enrolling 27,145 students, an 11.2% decrease from the number reported in 1981/82. **Table 11.0** lists the number of students in programs in each world region and in worldwide programs, as well as each region's percentage of all study-abroad students and the number of countries with programs within each region. **Table 11.0** and **Figure 11A** show that 72.2% (19,588) of all U.S. college-sponsored study-

abroad students were located in Europe. An additional 14.2% (3,849) were enrolled in worldwide programs, which sent students to more than one region but were likely to have sent a large percentage to Europe. Less than 14% of all students reported were located in the remaining world regions, with 7.1% in Asia, 5.5% in Latin America, 0.6% in Africa, 0.3% in Oceania, and 0.1% in North America. These students studied in a total of 50 countries.

The regional distribution of U.S. students in study-abroad programs is shown for the five-year period 1978/79–1982/83 in **Table 11.1**. In every region the number of students reported in 1982/83 decreased from the previous year, the largest declines occurring in North America and worldwide programs (76.1% and 26.9%, respectively).

Table 11.2 lists the number of programs for each world region and the percentage they represent of all programs. Of the 654 programs reported, 476 or 72.8% sent students to Europe. The second-largest number of programs was found in Asia, 77 programs or 11.8% of all programs. There were 44 programs in Latin America and 37 programs in the worldwide category. Africa, North America, and Oceania each hosted fewer than 10 programs.

The host countries in each world region with the largest numbers of students reported in 1982/83 are listed in **Table 11.3**, with number and percentage changes from 1981/82 to 1982/83. The five leading host countries in Europe had the most students reported, individually surpassing enrollments from any country in any other world region. Closest was Israel, with 1,341 study-abroad students in 1982/83.

One country in Africa and two countries in Latin America had the greatest reported percentage increases: Liberia (200.0%), Peru (95.7%), and Mexico

(88.7%). Those countries showing the greatest proportional declines were Canada (−76.1%), Costa Rica (−42.3%), and China (−32.8%).

Table 11.4 shows the 21 countries with the largest reported number of U.S study-abroad students and the number of college-sponsored programs in each country in 1982/83. Twelve of these countries are in Europe, further illustrating the preference of U.S. students for study in Europe.

The percentage of male and female study-abroad students in each world region and for the five largest countries within each region is provided in **Table 11.5**. This table and **Figure 11B** show that the U.S. college-sponsored study-abroad programs enroll substantially larger proportions of female than male students: 62.0% to 38.0%. However, these proportions varied regionally, with more male students (56.1%) in Asia. This was due in part to the dominance of Israel, with 59.7% men and nearly five times as many students (**Table 11.3**) as the next-largest host country in that region.

Several countries hosted substantially larger-than-average proportions of female students: Liberia had 83.3% women, France 71.5%, and Egypt and Australia, 70.0%. Countries reporting more men than women included Israel, China, Taiwan, Brazil, and Kenya.

Table 11.6 lists the 13 study-abroad programs that reported enrolling 250 or more students. The five largest programs enrolled 13.5% of all students; the 13 in **Table 11.6**, 2.0% of the 654 programs reported, enrolled 6,860 students or 25.3% of all study-abroad students.

Field of Study Offerings in Study-Abroad Programs

Table 11.7 summarizes the fields of study and the number of programs offered in each field in 1981/82 and 1982/83. Included are all programs that specified fields of study in addition to the language and culture of the countries in which they operate. The social sciences were offered by more programs (356 or 54.4%) than any other field, with arts second (247 or 37.8%). Somewhat fewer offered humanities (142 or 21.7%) and business and management (75 or 11.5%), 8.1% offered education, while a total of 14.7% had offerings in the sciences, mathematics/computer science, engineering, agriculture, and/or health.

Table 11.7 also shows changes in the fields of study in U.S. college-sponsored programs. The number of programs in all fields dropped, the largest numerical drop was in programs offering social sciences, from 481 to 356, (−26.0%). This followed and reversed an increase of 14.8% from 1980/81 to 1981/82.

Table 11.8 lists the distribution of programs among world regions for each field of study. Europe again reigned as the favored region for U.S. students studying abroad, with the greater proportion of all fields offered. However, when viewed in relation to the regional percentage of all programs (**Table 11.2**), it is apparent that the field-of-study distribution does not always follow the collective pattern. In particular, the proportion of programs offering agriculture was lower than the proportion of all programs in Europe and higher than the total proportion in Asia. There were relatively higher proportions of programs offering arts, engineering, and mathematics/computer science in Europe, science and agriculture in Latin America, and education worldwide.

Table 11.9 lists the number of programs offered in each field of study for the 21 countries with the most U.S. students reported in 1982/83. The total number of programs and the countries where they were offered are listed for each field of study in **Table 11.10**.

The Unesco Survey

One other source of data on U.S. students enrolled in overseas universities is Unesco, which publishes for-

eign-student enrollment data collected by its member countries. The latest available data, published in Unesco's *Statistical Yearbook* 1982, are from 1979.

Unesco data were first included in the 1981/82 Open Doors and are reproduced here to provide the reader with additional facts on study abroad. It should be noted that the Unesco data cannot be compared directly with IIE college-sponsored study-abroad data since the two surveys measure different (though possibly overlapping) populations.

The Unesco data describe U.S. citizens enrolled in universities abroad as reported by the host government. The IIE survey describes U.S. citizens enrolled in U.S. college-sponsored study-abroad programs. The latter may be fully enrolled and receiving academic credit at U.S. institutions while attending classes on the campuses of foreign universities. In some cases, the foreign universities may also report their presence to Unesco, leading to their being counted in both surveys. Since U.S. college-sponsored study-abroad programs provide a variety of structures, ranging from efforts to facilitate student enrollment to the establishment by U.S. universities of overseas centers with some U.S. faculty, there is no way to accurately determine the overlap between Unesco and IIE data. In addition, neither survey is comprehensive—leaving significant gaps in the information provided. Further caution is required in comparing data since Unesco figures are from 1979.

The Unesco data are compiled from reports from 45 countries with large numbers of foreign students. Unesco states that this subsample reflects "approximately 90% of the known total." However, as noted in **Section 1**, data for three countries known to have large numbers of foreign students (Brazil, Romania, and Lebanon) were not fully reported and are not included in this group. Latin American countries (other than Cuba and Guatemala) have not reported in recent years and are also excluded. This most likely eliminates a substantial number of U.S. students enrolled abroad.

In 1979, 37 countries reported U.S. students. Six countries reported having no U.S. students: the U.S.S.R., Morocco, Turkey, Algeria, Singapore, and Qatar. The German Democratic Republic reported 354 students from North America, but did not give country-of-origin breakdowns. (Unesco defines North America as including Central America and the Caribbean as well as the United States and Canada.)

Unesco data on the regional distribution of U.S. students in overseas universities in 1979 are provided in **Table 11.11**. A similar summary of data from the 1979 college-sponsored study-abroad survey is provided in **Table 11.12**. (Although these data measure different populations and cannot be directly compared, it is interesting to note that the largest discrepancy occurs in the number of students reported in Latin America.) **Table 11.13** lists Unesco enrollment figures for those countries reporting U.S. students.

The Unesco data show that more than 70% of all reported U.S. students in foreign universities were located in 19 European countries (approximately one-half of all countries reporting U.S. students). Of the 15 countries reporting the most U.S. students, all but three (Canada, the Philippines, and Japan) are in Europe. The region reporting the second-largest enrollment of U.S. students was North America (17.5%), with 3,640 students in Canada. As already noted, regional and country rankings may be skewed by the lack of data from Latin America and elsewhere.

INSTITUTIONS LISTED -- 2,844

APPENDIX 2: Nationality of Foreign Students

Appendix 2 lists detailed results on the country of citizenship of nonimmigrant students. Included are five figures for each country and territory reported. They are as follows:

1. **The 1982/83 Extrapolated Count**, based upon comparable calculations reported in *Open Doors: 1982/83.*

2. **Base Numbers,** the actual count of students for whom information was provided on country of citizenship on the STEP 2 form (see **Appendix 7**). This is based on STEP 2 Institutional Data reports on 290,122 students by 2,180 institutions.

3. **Percentage Distribution**, the percentage of the 290,122 students represented by the Base Number for each country or territory. The percentage distribution was not calculated for countries with fewer than 145 students reported.

4. **Extrapolated Count**, the World Total of 338,890 representing the actual count (338,894) of all nonimmigrant students reported in the survey for 1983/84. This number includes (1) the Base Number (290,122 students) on which detailed country data was provided of the total 298,755 students reported on the STEP 2 form plus (2) an additional 40,139 students reported by 318 institutions that did not provide STEP 2 data.

For countries with a Base Number of 145 or more reported students, the Base Number was multiplied by 1.1681 and rounded to the nearest 10 to determine their extrapolated share of the total student count of 338,890. These figures are used in **Part 1** of this book.

5. **Percentage Change**, the percentage change between Extrapolated Counts for 1982/83 and 1983/84. Base Numbers are used when Extrapolated Counts are not available.

APPENDIX 3: Fields of Study

Major Field-of-Study Categories

AGRICULTURE
01 Agribusiness and Agricultural Production
02 Agricultural Sciences
03 Renewable Natural Resources

ARCHITECTURE AND ENVIRONMENTAL DESIGN
04 Architecture and Environmental Design

AREA AND ETHNIC STUDIES
05 Area and Ethnic Studies

BUSINESS
06 Business and Management
07 Business and Office
08 Marketing and Distribution

COMMUNICATIONS
09 Communications
10 Communication Technologies

COMPUTER AND INFORMATION SCIENCES
11 Computer and Information Sciences

CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES
12 Consumer, Personal, and Miscellaneous Services

EDUCATION
13 Education

ENGINEERING
14 Engineering
15 Engineering and Engineering Related Technologies

FOREIGN LANGUAGES
16 Foreign Languages

HEALTH
17 Allied Health
18 Health Sciences

HOME ECONOMICS
19 Home Economics
20 Vocational Home Economics

INDUSTRIAL ARTS
21 Industrial Arts

LAW
22 Law

LETTERS
23 Letters

LIBERAL/GENERAL STUDIES
24 Liberal/General Studies

LIBRARY AND ARCHIVAL SCIENCES
25 Library and Archival Sciences

LIFE SCIENCES
26 Life Sciences

MATHEMATICS
27 Mathematics

MILITARY SCIENCES
28 Military Sciences
29 Military Technologies

MULTI/INTERDISCIPLINARY STUDIES
30 Multi/Interdisciplinary Studies

PARKS AND RECREATION
31 Parks and Recreation

PERSONAL AND SOCIAL DEVELOPMENT
32 Basic Skills
33 Citizenship/Civic Activities
34 Health-Related Activities
35 Interpersonal Skills
36 Leisure and Recreational Activities
37 Personal Awareness

PHILOSOPHY, RELIGION, AND THEOLOGY
38 Philosophy and Religion
39 Theology

PHYSICAL SCIENCES
40 Physical Sciences
41 Science Technologies

PSYCHOLOGY
42 Psychology

PUBLIC AFFAIRS AND PROTECTIVE SERVICES
43 Protective Services
44 Public Affairs

SOCIAL SCIENCES
45 Social Sciences

TRADE AND INDUSTRIAL
46 Construction Trades
47 Mechanics and Repairers
48 Precision Production
49 Transportation and Material Moving

VISUAL AND PERFORMING ARTS
50 Visual and Performing Arts

INTENSIVE ENGLISH LANGUAGE
60 Intensive English Language

UNDECLARED
90 Undeclared

Detailed Field-of-Study Categories

A classification of instructional programs produced by the National Center for Education Statistics

CODE	FIELD OF STUDY
01.000	**AGRIBUSINESS AND AGRICULTURAL PRODUCTION**
01.0101	Agricultural business and management, general
01.0102	Agricultural business
01.0103	Agricultural economics
01.0104	Farm and ranch management
01.0199	Agricultural business and management, other
01.0201	Agricultural mechanics, general
01.0202	Agricultural electrification, power, and controls
01.0203	Agricultural mechanics, construction, and maintenance skills
01.0204	Agricultural power machinery
01.0205	Agricultural structures, equipment, and facilities
01.0206	Soil and water mechanical practices
01.0299	Agricultural mechanics, other
01.0301	Agricultural production, general
01.0302	Animal production
01.0303	Aquaculture
01.0304	Crop production
01.0305	Game farm management
01.0399	Agricultural production, other
01.0401	Agricultural products and processing, general
01.0402	Food products
01.0403	Nonfood products
01.0499	Agricultural products and processing, other
01.0501	Agricultural services and supplies, general
01.0502	Agricultural services
01.0503	Agricultural supplies marketing
01.0504	Animal grooming
01.0505	Animal training
01.0506	Horseshoeing
01.0599	Agricultural services and supplies, other
01.0601	Horticulture, general
01.0602	Arboriculture
01.0603	Floriculture
01.0604	Greenhouse operation and management
01.0605	Landscaping
01.0606	Nursery operation and management
01.0607	Turf management
01.0699	Horticulture, other
01.0701	International agriculture
01.9999	Agribusiness and agricultural production, other
02.0000	**AGRICULTURAL SCIENCES**
02.0101	Agricultural sciences, general
02.0201	Animal sciences, general
02.0202	Animal breeding and genetics
02.0203	Animal health
02.0204	Animal nutrition
02.0205	Animal physiology
02.0206	Dairy
02.0207	Fisheries science
02.0208	Livestock
02.0209	Poultry
02.0299	Animal sciences, other
02.0301	Food sciences, general
02.0302	Dairy processing
02.0303	Food distribution
02.0304	Food engineering
02.0305	Food packaging
02.0306	Food technology
02.0399	Food sciences, other
02.0401	Plant sciences, general
02.0402	Agronomy
02.0403	Horticulture science
02.0404	Ornamental horticulture
02.0405	Plant breeding and genetics
02.0406	Plant pathology (applied)
02.0407	Plant physiology
02.0408	Plant protection (pest management)
02.0409	Range management
02.0410	Turf management science
02.0499	Plant sciences, other
02.0501	Soil sciences, general
02.0502	Soil chemistry
02.0503	Soil conservation
02.0504	Soil management and fertility
02.0505	Soil microbiology
02.0506	Soil physics
02.0599	Soil sciences, other
02.9999	Agricultural sciences, other
03.0000	**RENEWABLE NATURAL RESOURCES**
03.0101	Renewable natural resources, general
03.0201	Conservation and regulation, general
03.0202	Conservation
03.0203	Resources protection and regulation
03.0299	Conservation and regulation, other
03.0301	Fishing and fisheries, general
03.0302	Fisheries
03.0399	Fishing and fisheries, other
03.0401	Forestry production and processing, general
03.0402	Forest production
03.0403	Forest products utilization
03.0404	Forest products processing technology
03.0405	Logging
03.0406	Pulp and paper production
03.0499	Forestry production and processing, other
03.0501	Forestry and related sciences, general
03.0502	Forestry science
03.0503	Forest biology
03.0504	Forest engineering
03.0505	Forest hydrology
03.0506	Forest management
03.0507	Forest mensuration
03.0508	Urban forestry
03.0509	Wood science
03.0599	Forestry and related sciences, other
03.0601	Wildlife management
03.9999	Renewable natural resources, other
04.0000	**ARCHITECTURE AND ENVIRONMENTAL DESIGN**
04.0101	Architecture and environmental design, general
04.0201	Architecture
04.0301	City, community, and regional planning
04.0401	Environmental design
04.0501	Interior design
04.0601	Landscape architecture
04.0701	Urban design
04.9999	Architecture and environmental design, other
05.0000	**AREA AND ETHNIC STUDIES**
05.0101	African studies
05.0102	American studies
05.0103	Asian studies, general
05.0104	East Asian studies
05.0105	Eastern European studies
05.0106	European studies, general
05.0107	Latin American studies
05.0108	Middle Eastern studies
05.0109	Pacific area studies
05.0110	Russian and Slavic studies
05.0111	Scandinavian studies
05.0112	South Asian studies
05.0113	Southeast Asian studies
05.0114	Western European studies
05.0199	Area studies, other
05.0201	Afro-American (black) studies
05.0202	American Indian studies
05.0203	Hispanic-American studies
05.0204	Islamic studies
05.0205	Jewish studies
05.0299	Ethnic studies, other
05.9999	Area and ethnic studies, other
06.0000	**BUSINESS AND MANAGEMENT**
06.0101	Business and management, general
06.0201	Accounting
06.0301	Banking and finance
06.0401	Business administration and management, general

06.0402	Contract management and procurement/purchasing
06.0403	Product management
06.0404	Systems efficiency analysis
06.0499	Business administration and management, other
06.0501	Business economics
06.0601	Human resources development
06.0701	Hotel/motel management
06.0702	Recreational enterprises management
06.0703	Resort management
06.0704	Restaurant management
06.0705	Transportation management
06.0799	Institutional management, other
06.0801	Insurance and risk management
06.0901	International business management
06.1001	Investments and securities
06.1101	Labor/industrial relations
06.1201	Management information systems
06.1301	Business statistics
06.1302	Operations research (quantitative methods)
06.1399	Management science, other
06.1401	Marketing management
06.1402	Marketing research
06.1499	Marketing management and research, other
06.1501	Organizational behavior
06.1601	Personnel management
06.1701	Real estate, general
06.1702	Commercial property
06.1703	Property management
06.1704	Real estate appraisal
06.1705	Real estate finance
06.1706	Real estate law
06.1707	Residential property
06.1799	Real estate, other
06.1801	Small business management
06.1802	Small business ownership
06.1899	Small business management and ownership, other
06.1901	Taxation
06.2001	Trade and industrial supervision and management
06.9999	Business and management, other

07.0000 BUSINESS AND OFFICE

07.0101	Accounting, bookkeeping, and related programs, general
07.0102	Accounting and computing
07.0103	Bookkeeping
07.0104	Machine billing, bookkeeping, and computing
07.0199	Accounting, bookkeeping, and related programs, other
07.0201	Banking and related financial programs, general
07.0202	Credit collection clerk
07.0203	Insurance clerk
07.0204	Loan clerk
07.0205	Teller
07.0206	Transit clerk
07.0299	Banking and related financial programs, other
07.0300	Business data processing and related programs
07.0301	Business data processing and related programs, general
07.0302	Business computer and console operation
07.0303	Business data entry equipment operation
07.0304	Business data peripheral equipment operation
07.0305	Business data programming
07.0306	Business systems analysis
07.0399	Business data processing and related programs, other
07.0401	Office supervision and management
07.0501	Personnel and training programs, general
07.0502	Educational assisting and training
07.0503	Personnel assisting
07.0599	Personnel and training programs, other
07.0601	Secretarial and related programs, general
07.0602	Court reporting
07.0603	Executive secretarial
07.0604	Legal secretarial
07.0605	Medical secretarial
07.0606	Secretarial
07.0607	Stenographic
07.0608	Word processing
07.0699	Secretarial and related programs, other
07.0701	Typing, general office, and related programs, general
07.0702	Clerk-typist
07.0703	Correspondence clerk
07.0704	Duplicating machine operation
07.0705	General office clerk
07.0706	Mail and order clerk
07.0707	Receptionist and communication systems operation
07.0708	Shipping, receiving, and stock clerk
07.0709	Traffic, rate, and transportation clerk
07.0710	Typing
07.0799	Typing, general office, and related programs, other
07.9999	Business and office, other

08.0000 MARKETING AND DISTRIBUTION

08.0101	Apparel and accessories marketing, general
08.0102	Fashion merchandising
08.0103	Fashion modeling
08.0104	Footwear marketing
08.0105	Jewelry marketing
08.0199	Apparel and accessories marketing, other

08.1003	Life insurance marketing
08.1004	Property and casualty insurance marketing
08.1099	Insurance marketing, other
08.1101	Transportation and travel marketing, general
08.1102	Freight transportation marketing
08.1103	Passenger transportation marketing
08.1104	Tourism
08.1105	Travel services marketing
08.1106	Warehouse services marketing
08.1199	Transportation and travel marketing, other
08.1201	Vehicles and petroleum marketing, general
08.1202	Agricultural implements and machinery marketing
08.1203	Automotive vehicles and accessories marketing
08.1204	Petroleum wholesaling
08.1205	Recreational vehicles and accessories marketing
08.1206	Service station retailing
08.1207	Vehicle rental and leasing
08.1299	Vehicles and petroleum marketing, other
08.9999	Marketing and distribution, other

09.0000 COMMUNICATIONS

09.0101	Communications, general
09.0201	Advertising
09.0301	Communications research
09.0401	Journalism (mass communications)

09.0501	Public relations
09.0601	Radio/television news broadcast
09.0701	Radio/television, general
09.9999	Communications, other

10.0000 COMMUNICATION TECHNOLOGIES

10.0101	Educational media technology
10.0102	Motion picture technology
10.0103	Photographic technology
10.0104	Radio and television production and broadcasting technology
10.0199	Communication technologies, other

11.0000 COMPUTER AND INFORMATION SCIENCES

11.0101	Computer and information sciences, general
11.0201	Computer programming
11.0301	Data processing
11.0401	Information sciences and systems
11.0501	Systems analysis
11.9999	Computer and information sciences, other

12.0000 CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES

12.0101	Drycleanimg and laundering services, general
12.0102	Drycleaning
12.0103	Laundering
12.0199	Drycleaning and laundering services, other
12.0201	Entertainment services, general
12.0202	Bartending
12.0203	Card dealing
12.0204	Umpiring
12.0299	Entertainment services, other
12.0301	Funeral services
12.0401	Personal services, general
12.0402	Barbering
12.0403	Cosmetology
12.0404	Electrolysis
12.0405	Massage
12.0499	Personal services, other
12.9999	Consumer, personal, and miscellaneous services, other

13.0000 EDUCATION

13.0101	Education, general
13.0201	Bilingual/bicultural education
13.0301	Curriculum and instruction
13.0401	Education administration, general
13.0402	Administration of special education
13.0403	Adult and continuing education administration
13.0404	Educational supervision
13.0405	Elementary and secondary education administration
13.0406	Higher education administration
13.0407	Community college education administration
13.0499	Education administration, other
13.0501	Educational media
13.0601	Evaluation and research, general
13.0602	Adult and continuing education research
13.0603	Educational statistics and research
13.0604	Educational testing, evaluation, and measurement
13.0605	Elementary and secondary research
13.0606	Higher education research
13.0699	Evaluation and research, other
13.0701	International and comparative education
13.0801	School psychology
13.0901	Social foundations
13.1001	Special education, general
13.1002	Education of the culturally disadvantaged
13.1003	Education of the deaf and hearing impaired
13.1004	Education of the gifted and talented
13.1005	Education of the emotionally handicapped
13.1006	Education of the mentally handicapped
13.1007	Education of the multiple handicapped
13.10008	Education of the physically handicapped
13.1009	Education of the visually handicapped
13.1010	Remedial education
13.1011	Specific learning disabilities
13.1012	Speech correction
13.1099	Special education, other

45.1201	Urban studies
45.9999	Social sciences, other

46.0000 CONSTRUCTION TRADES

46.0101	Brickmasonry, stonemasonry, and tile setting, general
46.0102	Brick, block, and stonemasonry
46.0103	Tile setting
46.0199	Brickmasonry, stonemasonry, and tile setting, other
46.0201	Carpentry
46.0301	Electrical and power transmission installation, general
46.0302	Electrician
46.0303	Lineworker
46.0399	Electrical and power transmission installation, other
46.0401	Building maintenance
46.0402	Concrete placing and finishing
46.0403	Construction inspection
46.0404	Drywall installation
46.0405	Floor covering installation
46.0406	Glazing
46.0407	Insulation installation
46.0408	Painting and decorating
46.0409	Plastering
46.0410	Roofing
46.0411	Terrazzo installation
46.0499	Miscellaneous construction trades, other
46.0501	Plumbing, pipefitting, and steamfitting, general
46.0502	Pipefitting and steamfitting
46.0503	Plumbing
46.0599	Plumbing, pipefitting, and steamfitting, other
46.9999	Construction trades, other

47.0000 MECHANICS AND REPAIRERS

47.0101	Electrical and electronics equipment repair, general
47.0102	Business machine repair
47.0103	Communication electronics
47.0104	Computer electronics
47.0105	Industrial electronics
47.0106	Major appliance repair
47.0107	Motor repair
47.0108	Small appliance repair
47.0109	Vending and recreational machine repair
47.0199	Electrical and electronics equipment repair, other
47.0201	Heating, air conditioning, and refrigeration mechanics, general
47.0202	Cooling and refrigeration
47.0203	Heating and air conditioning
47.0299	Heating, air conditioning, and refrigeration mechanics, other
47.0301	Industrial equipment maintenance and repair, general

47.0302	Heavy equipment maintenance and repair
47.0303	Industrial machinery maintenance and repair
47.0304	Mine equipment maintenance and repair
47.0305	Oil and gas drilling equipment operation and maintenance
47.0399	Industrial equipment maintenance and repair, other
47.0401	Electromechanical, hydraulic, and pneumatic instrument repair
47.0402	Gunsmithing
47.0403	Locksmithing and safe repair
47.0404	Musical instrument repair
47.0405	Operation, maintenance, and repair of audio-visual equipment
47.0406	Shoe and boot repair
47.0407	Sporting goods equipment repair
47.0408	Watch repair
47.0499	Miscellaneous mechanics and repairers, other
47.0501	Stationary energy sources, general
47.0502	Conventional electric power generation
47.0503	Industrial nuclear energy
47.0504	Pumping plants
47.0599	Stationary energy sources, other
47.0601	Vehicle and mobile equipment mechanics and repairers, general
47.0602	Aircraft mechanics
47.0603	Automotive body repairs
47.0604	Automotive mechanics
47.0605	Diesel engine mechanics
47.0606	Small engine repair
47.0699	Vehicle and mobile equipment mechanics and repairers, other
47.9999	Mechanics and repairers, other

48.0000 PRECISION PRODUCTION

48.0101	Drafting, general
48.0102	Architectural drafting
48.0103	Civil/structural drafting
48.0104	Electrical/electronics drafting
48.0105	Mechanical drafting
48.0199	Drafting, other
48.0201	Graphic and printing communications, general
48.0202	Bookbinding
48.0203	Commercial art
48.0204	Commercial photography
48.0205	Composition, make-up, and typesetting
48.0206	Lithography, photography, and platemaking
48.0207	Photographic laboratory and darkroom
48.0208	Printing press operations
48.0209	Silk screen making and printing
48.0299	Graphic and printing communications, other
48.0301	Leathermaking and upholstering, general
48.0302	Saddlemaking and repair
48.0303	Upholstering
48.0399	Leatherworking and upholstering, other
48.0401	Precision food production, general
48.0402	Meatcutting
48.0403	Slaughtering and butchering
48.0499	Precision food, production, other
48.0501	Precision metal work, general
48.0502	Foundry work
48.0503	Machine tool operation/machine shop
48.0504	Metal fabrication
48.0505	Metal patternmaking
48.0506	Sheet metal
48.0507	Tool and die making
48.0508	Welding, brazing, and soldering
48.0599	Precision metal work, other
48.0601	Industrial ceramics manufacturing
48.0602	Jewelry design, fabrication, and repair
48.0603	Optical goods work
48.0604	Plastics
48.0699	Precision work, assorted materials, other
48.0701	Woodworking, general
48.0702	Furniture making
48.0703	Millwork and cabinet making
48.0799	Woodworking, other
48.9999	Precision production, other

49.0000 TRANSPORTATION AND MATERIAL MOVING

49.0101	Air transportation, general
49.0102	Airplane piloting and navigation
49.0103	Aviation computer technology
49.0104	Aviation management
49.0105	Air traffic control
49.0106	Flight attendants
49.0199	Air transportation, other
49.0201	Vehicle and equipment operation, general
49.0202	Construction equipment operation
49.0203	Material handling
49.0204	Mining equipment operation
49.0205	Truck and bus driving
49.0299	Vehicle and equipment operation, other
49.0301	Water transportation, general
49.0302	Barge and boat operation
49.0303	Commercial fishing operation
49.0304	Deep water diving and life support systems
49.0305	Marina operations
49.0306	Marine maintenance
49.0307	Merchant Marine officers
49.0308	Sailors and deckhands
49.0399	Water transportation, other
49.9999	Transportation and material moving, other

50.0000 VISUAL AND PERFORMING ARTS

50.0101	Visual and performing arts, general

APPENDIX 6: Data Collection

In collaboration with the Interassociational Committee on Data Collection, IIE surveyed all the two- and four-year institutions with regional accreditation listed in the *Education Directory 1981/82*.

The survey was completed in three steps. Step 1 asked for the completion of a postcard requesting the total number of foreign students enrolled at an institution. Step 2 was a form (see Appendix 7: Survey Materials) in which institutional data on the eight characteristics of foreign students were requested. Step 3 was a request for data on individual students. The result of that step will be published in the next edition of *Profiles*.

Table A6.0 shows the response rate of the institutions surveyed, while Table A6.1 indicates the number of detailed responses. Table A6.2 provides a summary of the detailed response to the survey.

TABLE A6.0

Survey Response, Selected Years, 1954/55–1983/84

Year	Institutions Surveyed	Responding Institutions with Foreign Students	Responding Institutions with No Foreign Students	Total Responding Institutions	Percentage Response
1954/55	2,855	1,629	1,013	2,642	**92.5**
1959/60	3,008	1,712	808	2,520	**83.8**
1964/65	2,556	1,859	434	2,293	**89.7**
1969/70	2,859	1,734	265	1,999	**69.9**
1974/75	3,085	1,760	148	1,908	**61.8**
1975/76	3,065	2,093	168	2,261	**73.8**
1976/77	3,016	2,294	230	2,524	**83.7**
1977/78	3,053	2,475	263	2,738	**89.7**
1978/79	3,127	2,504	248	2,752	**88.0**
1979/80	3,186	2,651	299	2,950	**92.6**
1980/81	3,205	2,734	296	3,030	**94.5**
1981/82	2,862	2,454	239	2,693	**94.1**
1982/83	2,849	2,529	266	2,795	**98.1**
1983/84	2,844	2,498	268	2,766	**97.3**

TABLE A6.1

Type of Response from Institutions Reporting Foreign Students, Selected Years, 1979/80–1983/84

Type of Response	1979/80*		1980/81		1981/82		1982/83		1983/84	
	Number	%	Number	%	Number	%	Number	%	Number	%
Total Only—STEP 1	506	**19.1**	299	**10.9**	414	**16.9**	212	**8.4**	318	**12.7**
Institutional Data—STEP 2	2,145	**80.9**	2,435	**89.1**	2,040	**83.1**	2,317	**91.6**	2,180	**87.3**
Individual Data—STEP 3	1,961	**74.0**	—	—	1,845	**75.2**	—	—	2,007	**80.3**
TOTAL	**2,651**	**100.0**	**2,734**	**100.0**	**2,454**	**100.0**	**2,529**	**100.0**	**2,498**	**100.0**

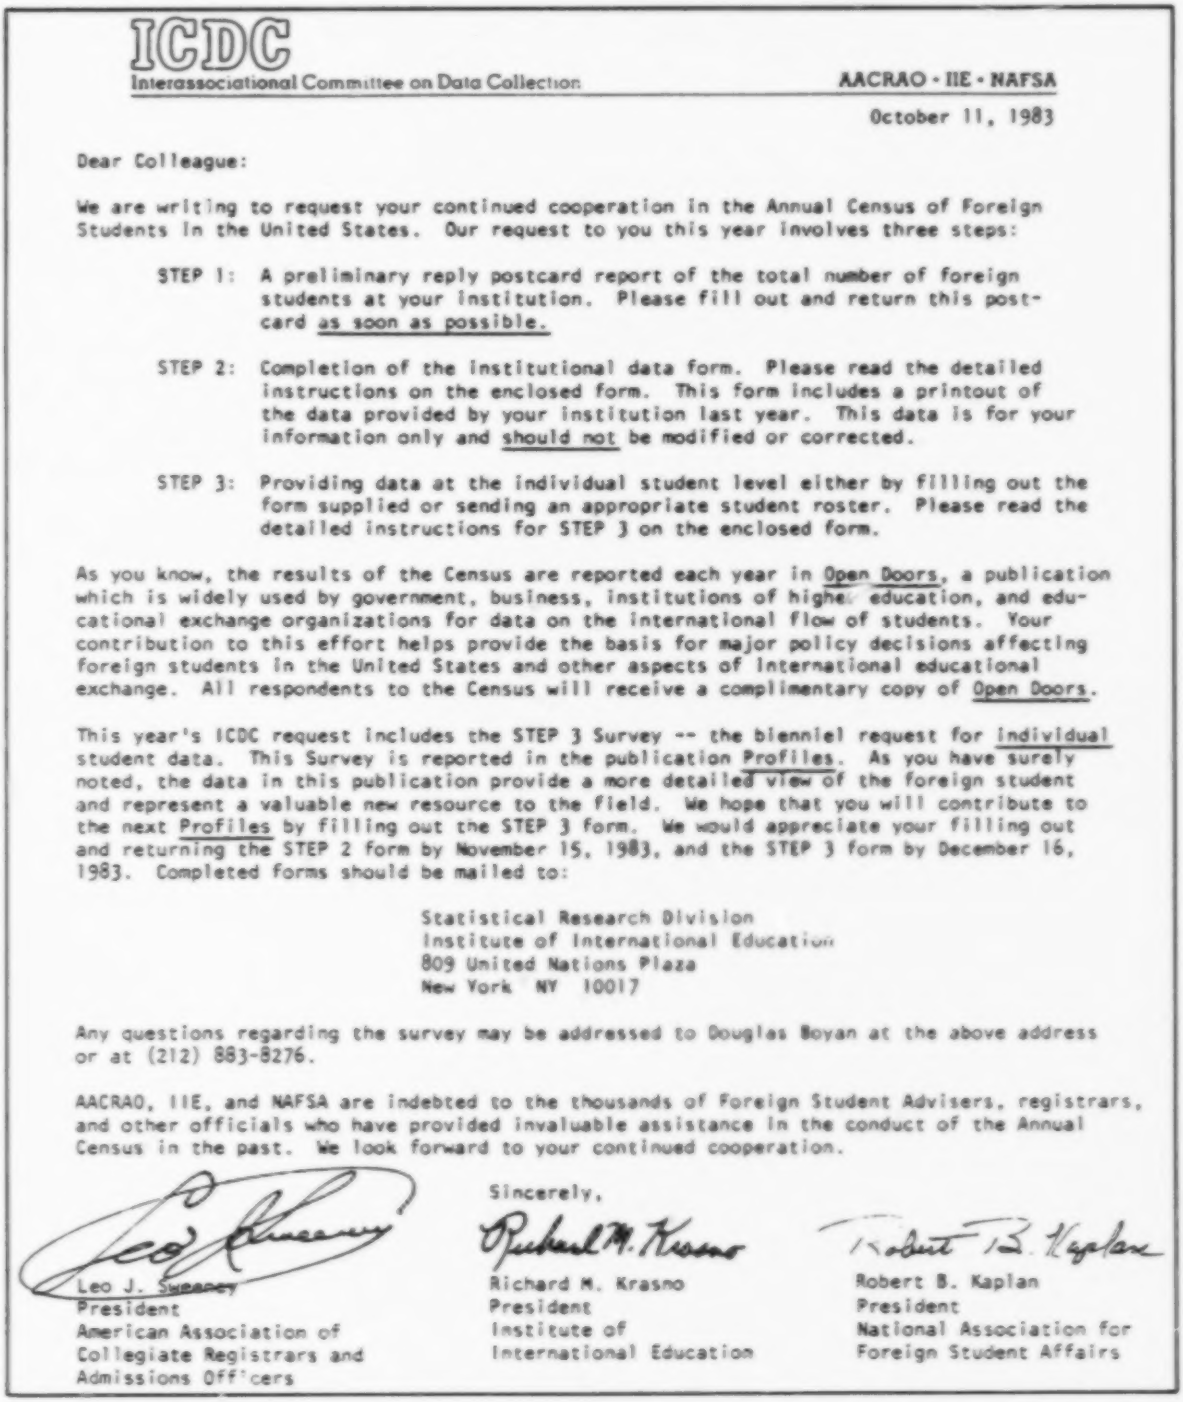
** All institutions supplying data for 1979/80 are included in the Institutional Data totals for that year.*

TABLE A6.2

Summary of Institutional Data Responses (Step 2), 1983/84

Category	Foreign Students Reported	Percentage of 298,755 STEP 2 Rerponses	Percentage of All Foreign Students Reported (338,894)
Nationality	290,122	97.1	**85.6**
Academic Level	280,198	93.8	**82.7**
Sex	273,918	91.7	**80.8**
Field of Study	261,612	87.6	**77.2**
Enrollment Status	261,335	87.5	**77.1**
Visa Type	252,020	84.4	**74.4**
Marital Status	176,931	59.2	**52.2**
Primary Source of Funds	176,455	59.1	**52.1**
TOTAL REPORTED	**298,755**		**88.2**

APPENDIX 7: Survey Materials



ICDC
Interassociational Committee on Data Collection
AACRAO · IIE · NAFSA

October 11, 1983

Dear Colleague:

We are writing to request your continued cooperation in the Annual Census of Foreign Students in the United States. Our request to you this year involves three steps:

STEP 1: A preliminary reply postcard report of the total number of foreign students at your institution. Please fill out and return this postcard as soon as possible.

STEP 2: Completion of the institutional data form. Please read the detailed instructions on the enclosed form. This form includes a printout of the data provided by your institution last year. This data is for your information only and should not be modified or corrected.

STEP 3: Providing data at the individual student level either by filling out the form supplied or sending an appropriate student roster. Please read the detailed instructions for STEP 3 on the enclosed form.

As you know, the results of the Census are reported each year in Open Doors, a publication which is widely used by government, business, institutions of higher education, and educational exchange organizations for data on the international flow of students. Your contribution to this effort helps provide the basis for major policy decisions affecting foreign students in the United States and other aspects of international educational exchange. All respondents to the Census will receive a complimentary copy of Open Doors.

This year's ICDC request includes the STEP 3 Survey -- the biennial request for individual student data. This Survey is reported in the publication Profiles. As you have surely noted, the data in this publication provide a more detailed view of the foreign student and represent a valuable new resource to the field. We hope that you will contribute to the next Profiles by filling out the STEP 3 form. We would appreciate your filling out and returning the STEP 2 form by November 15, 1983, and the STEP 3 form by December 16, 1983. Completed forms should be mailed to:

Statistical Research Division
Institute of International Education
809 United Nations Plaza
New York NY 10017

Any questions regarding the survey may be addressed to Douglas Boyan at the above address or at (212) 883-8276.

AACRAO, IIE, and NAFSA are indebted to the thousands of Foreign Student Advisers, registrars, and other officials who have provided invaluable assistance in the conduct of the Annual Census in the past. We look forward to your continued cooperation.

Sincerely,

Leo J. Sweeney
President
American Association of Collegiate Registrars and Admissions Officers

STEP 1 Preliminary Reply Card

AACRAO • IIE • NAFSA Interassociational Committee on Data Collection

ICDC ANNUAL CENSUS OF FOREIGN STUDENTS 1983/84

Please complete and return this card as soon as possible, **even if you had no foreign non-immigrant students.**

Title/Office

Reporting Official

Institution

City State Zip

Reporting Official Telephone: (____) ____________________

The attached label should include the Title/Office, Reporting Official, and the institution's name and address. Please make any necessary changes.

1. Were there any foreign students (non-immigrants) enrolled at your institution for the 1983/84 fall term?

   ☐ Yes ☐ No

2. If "YES," fill in total number: ☐

3. This number is: ☐ Actual ☐ Estimated

STEP 2 INSTITUTIONAL DATA

PAGE 1

ICDC AACRAO - IIE - NAFSA Interassociational Committee on Data Collection

ANNUAL CENSUS OF FOREIGN STUDENTS 1983/84

DEFINITIONS

A. TOTAL FOREIGN STUDENTS — a foreign student is anyone enrolled for courses in the United States who is **not** a citizen or an immigrant (permanent resident). Refugees **are** included. Do **not** include resident aliens (holding "green cards" — I-151).

B. SEX — number of male/female foreign students enrolled at your institution.

C. MARITAL STATUS — a count of foreign students at your institution who are **not** married/married.

D. VISA TYPE/REFUGEE — the count of foreign students with **temporary visas** enrolled at your institution by the type of visa they hold, and the count of **refugees** enrolled at your institution.

E. PRIMARY SOURCE OF FUNDS — the single greatest source of funds for all educational expenses including associated living expenses for a foreign student enrolled in an educational institution within the United States. If a person had more than one source of funds then **use the source** which represents the largest percentage of all income.

(1) Personal and Family — income derived from personal or private sources.
(2) College/University — funds obtained from a U.S. college or university (grants, scholarships, waivers, etc.). This does **not** include employment at the institution.
(3) Home Government — funds obtained from the government of the student's home country.
(4) U.S. Government — funds obtained from the United States government.
(5) Private Sponsorship Within the U.S. — self-explanatory.
(6) Private Sponsorship Foreign — self-explanatory.
(7) Employment — self-explanatory.
(8) Other — primary source not among those listed.

F. ENROLLMENT STATUS — the total number of foreign students who are attending classes **full time/part time**. Use your institution's definition of full time.

G. ACADEMIC LEVEL — a count of the foreign students by degree level or type of program who are currently enrolled this **fall** term. Include under Intensive English Language only students enrolled in 15 or more contact hours per week.

H. FIELD OF STUDY — please use categories in Section H of this form, which are derived from the NCES (National Center for Education Statistics) Classification of Instructional Programs. This classification system has been developed for institutional reports for federal agencies and is being implemented in federal surveys. If you are unsure of a category, use the space provided on page 4 for additional fields. A detailed listing of this new classification system appears in **Open Doors: 1982/83.**

I. COUNTRY OF CITIZENSHIP — if you have students from countries not included on this form, please use the space provided on page 4.

GUIDELINES FOR THE RELEASE OF CENSUS DATA

Reports based on census data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment.

Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Students names obtained as a by-product of the census activity will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data can be documented and to withhold census data when the request is not deemed to be for appropriate scholarly, public information or recruitment purposes.

1983/84 DATA COLLECTION
STEP 2 INSTRUCTIONS

- INCLUDE ONLY NON-IMMIGRANT FOREIGN STUDENTS AT THE POSTSECONDARY LEVEL
- ALL INFORMATION SHOULD BE BASED ON THE **FALL TERM, 1983**
- DEADLINE FOR THE RETURN OF THIS FORM NOVEMBER 15, 1983

STEP 2 asks institutions to provide **aggregate** data describing the characteristics of their foreign student population for the fall term, 1983. This information is used to develop the statistics used in **Open Doors**, a complimentary copy of which is sent to the census contact at each participating institution.

The validity of the data in **Open Doors** depends on the amount of detailed data which you provide on this form to supplement the total foreign student count you provide on the STEP 1 postcard. While we encourage you to provide detail on all characteristics, if you cannot do so, any data, e.g. country of citizenship, field of study, academic level, etc., will add to the validity of the data on foreign students and will enhance the value of the final report in **Open Doors.**

This year's STEP 2 form includes the data in our files about your institution in two categories: (1) **Basic Institutional Data** and (2) data from the 1982/83 Census of Foreign Students which was used in the 1982/83 **Open Doors. The Basic Institutional Data** (1) should be carefully **reviewed** and any corrections made on the form. 1982/83 Census data (2) is included **for your reference** only. **DO NOT ADD OR CORRECT 1982/83 DATA.** Any major differences between the two census years should, of course, be a warning that the 1983/84 figures be verified. Please make sure that the definitions you are using match the definitions on this page in cases where the data appears to have changed significantly between census years.

Page 2 of this form is for reporting Basic Institutional Data and the Personal and Academic Characteristics of foreign students. Page 3 is for reporting foreign student countries of citizenship. Page 4 provides space for the inclusion of fields of study and countries of citizenship which are not among those on pages 2 & 3.

If the data requested will only be available after the deadline date of November 15, 1983, contact IIE so that special arrangements can be made to include it in the census. Any questions should be directed to:

Douglas R. Boyan, Manager, Statistical Research, IIE, (212) 883-8276.

THIS FORM SHOULD BE RETURNED BY NOVEMBER 15, 1983 TO:

STATISTICAL RESEARCH DIVISION
INSTITUTE OF INTERNATIONAL EDUCATION
809 United Nations Plaza
New York, N.Y. 10017
